

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 31, 2020 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (129 new fires)
New large incidents:	2
Large fires contained:	7
Uncontained large fires:***	26
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	5

Nationally, there are 13 large fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Understanding the IMSR.

On July 30, two Single Engine Air Tankers on contract with the Department of the Interior crashed while assigned to the Bishop fire near Caliente, NV. Both pilots were fatally injured. The firefighting community extends condolences to the family and friends of the deceased.

NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington, D.C.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Fairchild AFB (Spokane, WA), in support of wildland fire operations.

One MAFFS C-130 airtanker and support personnel each from the 152nd Airlift Wing (Nevada Air National Guard) and the 302nd Airlift Wing (Colorado Air Force Reserve) have been deployed to McClellan Airfield, CA, in support of wildland fire operations.

Active Incident Resource Summary

Northern California Area (PL 3)

New fires:	25
New large incidents:	0
Uncontained large fires:	8
Type 1 IMTs committed:	3
Type 2 IMTs committed:	2

July Complex, Modoc NF, USFS. IMT 1 (CA Team 1) and IMT 2 (CA Team 12). Thirty-six miles northwest of Canby, CA. Timber, brush and tall grass. Active fire behavior with flanking, creeping and backing. Energy and railroad infrastructure, structures and sage-grouse habitat threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Gold, Lassen-Modoc Unit, Cal Fire. IMT 1 (Cal Fire Team 4). Five miles south of Adin, CA. Timber. Minimal fire behavior with smoldering, creeping and single tree torching. Residences threatened. Evacuations, area, road and trail closures in effect.

Hog, Lassen-Modoc Unit, Cal Fire. Transfer of command from IMT 1 (Cal Fire Team 3) back to the local unit will occur today. Ten miles west of Susanville, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Community of Lake Forest and structures threatened. Area and trail closures in effect.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. IMT2 (CA Team 14). Fourteen miles northeast of Willow Creek, CA. Timber, chaparral and short grass. Active fire behavior with uphill runs, short-range spotting and flanking.

S-4, Northern California District, BLM. Forty miles northeast of Cedarville, CA. Timber, brush and tall grass. Minimal fire behavior with single tree torching and creeping. Structures and sage-grouse habitat threatened.

Adams, Plumas NF, USFS. Five miles south of Doyle, CA. Timber, brush and tall grass. Minimal fire behavior. Structures threatened.

MP 21, Hoopa Valley Tribe, BIA. Three miles south of Weitchpec, CA. Timber. Minimal fire behavior with smoldering.

Predictive Services Discussion: The Four Corners High will remain strongly amplified over the West. The near-record heat will continue across the Great Basin and the Pacific Northwest. Breezy conditions will develop along the Sierra Front in Nevada, creating critical fire weather conditions as it interacts with the usual low afternoon humidity. Widely scattered storms will be possible across the Okanagan and the western half of the Northern Rockies. Scattered convection will be possible across the northern Great Plains. The southwestern monsoon will remain suppressed due to the positioning and strength of the high pressure ridge that will remain anchored over Arizona. A stationary front will linger across the Carolinas, Tennessee River Valley and Texas, allowing for the redevelopment of scattered afternoon storms. Below normal temperatures are expected to continue across the Great Lakes region and New England, as a trough of low pressure remains over the region.

Uninformed on Strategy, Tactics, or Hazards

Operational Engagement

Firefighters who are uninformed on strategy, tactics, or hazards are in conflict with Watchout Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics, or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics, or hazards? Discuss ways you might establish communications; for example, contacting someone who is already on the fire and asking them what tactics and strategies are working or not working, what hazards they have witnessed, etc.
- Can scouting safely identify potential hazards? Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane). Discuss what types of hazards you might come across and ways you would mitigate them. For example, arriving at a fire after dark and being instructed to dig line downhill with the fire below. How could you make this a safe situation?
- Have strategies, tactics, or hazards changed since last informed? Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected do not arrive, etc.). Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.).
- Can you get a briefing from your supervisor? Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics. For example, if one crew decides to do a burnout, but doesn't let the crew at the other end of the line know what they are doing, then what can happen?
- To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information. Emphasize ways to inform firefighters about strategies, tactics, and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
 - Use the [Incident Response Pocket Guide, PMS 461](#) (back inside cover) Briefing Checklist.
