

**National Interagency Coordination Center
Incident Management Situation Report
Thursday June 4, 2020 – 0730 MT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (139 new fires)
New large incidents:	3
Large fires contained:	0
Uncontained large fires:***	9
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

Nationally, there are 5 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires: 17
 New large incidents: 1
 Uncontained large fires: 5
 Type 1 IMTs committed: 1

Sawtooth, Tonto National Forest, USFS. IMT 1 (SWA Team 1). Seven miles northwest of Superior, AZ. Brush and tall grass. Minimal fire behavior with backing, creeping and smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Sunset, Phoenix District Office, BLM. Thirty-two miles southeast of Prescott, AZ. Brush and tall grass. Minimal fire behavior. Trail closures in effect.

* **Rafael**, Southeast District, Arizona Department of Forestry and Fire Management. Fifteen miles southeast of Nogales, AZ. Brush and tall grass. Minimal fire behavior with running and spotting. Structures threatened.

Park, San Carlos Agency, BIA. One mile north of San Carlos, AZ. Brush and short grass. No new information.

Potter, Cimarron District, New Mexico State Forestry Division. Timber, tall and short grass. No new information.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: The low pressure area off the coast of Southern California will begin to weaken and slowly drift toward the coast. As it does so, the focus of convection will shift to be over the northern Great Basin and Wyoming. Hot and dry conditions are expected across the Southwest and West Texas as the Four Corners high pressure ridge begins to strengthen. Afternoon humidity levels will be in the single digits. Along the Canadian border, a breezy westerly flow will continue, extending from the Pacific Ocean in the West to the Atlantic Ocean in the East. In Alaska, scattered thunderstorms are expected across the Southern Interior as moist and unstable air begin to stream into the Interior.

Aviation Watch Outs

Aviation Category

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are hazards identified and known?

Flight Hazards: Have they been identified and assessed? Have the pilots been informed?

- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
 - Radio communications.
 - Environmental conditions – weather, visibility, terrain, elevation, temperatures.
 - Mission priorities.
 - Successful mission completion probabilities.
- Is there a better way to do it?
- Is there pressure to complete a mission at all costs?
- Can you justify your actions?
- Is the mission airspace confined or congested?
 - Multiple aircraft.
 - Mixed types of aircraft.
 - Poor visibility.
- Do you have an escape route?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
