

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 23, 2020 – 0730 MT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (108 new fires)
New large incidents:	4
Large fires contained:	3
Uncontained large fires:***	17
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	4

Nationally, there are 17 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	6
New large incidents:	0
Uncontained large fires:	9
Type 1 IMTs committed:	3
Type 2 IMTs committed	2

Bighorn, Coronado NF, USFS. IMT 1 (SW Team 2) and IMT 1 (NR Team 1). Five miles northeast of Tucson, AZ. Chaparral, brush and timber. Active fire behavior with uphill runs, single tree torching and short-range spotting. Numerous structures threatened. Evacuations, road, trail and area closures in effect.

Bush, Tonto NF, USFS. IMT 1 (SW Team 1). IMT is also managing the Central fire. Thirty-eight miles northeast of Mesa, AZ. Brush and tall grass. Moderate fire behavior with uphill runs, backing and creeping. Structures threatened. Evacuations, road, trail and area closures in effect.

Central, Tonto NF, USFS. Four miles east of New River, AZ. Brush and short grass. Minimal fire behavior with backing, creeping and smoldering. Structures threatened. Road, trail and area closures in effect.

Mangum, Kaibab NF, USFS. IMT 2 (SW Team 3). Twenty-four miles southeast of Fredonia, AZ. Timber, brush and short grass. Active fire behavior with wind-driven runs, torching and spotting. Numerous structures and energy infrastructure threatened. Evacuations, road, trail and area closures in effect.

Tadpole, Gila NF, USFS. Twelve miles north of Silver City, NM. Timber, brush and chaparral. Moderate fire behavior with backing, flanking and creeping. Structures threatened. Road, trail and area closures in effect.

Bringham, Apache-Sitgreaves NF, USFS. Transfer of command from IMT 2 (SW Team 4) back to the local unit will occur today. Twenty-two miles north of Morenci, AZ. Brush, short grass and timber. Active fire behavior with uphill runs, flanking and banking. Structures threatened. Road, trail and area closures in effect.

Good, Gila NF, USFS. Twenty-nine miles north of Silver City, NM. Timber, brush and tall grass. Moderate fire behavior with backing, creeping and smoldering.

Blue River, San Carlos Agency, BIA. Eight miles northeast of San Carlos, AZ. Brush and tall grass. No new information.

Dry Lake, San Carlos Agency, BIA. Thirty-four miles east of San Carlos, AZ. Brush, tall grass and timber. No new information.

Vics Peak, Cibola NF, USFS. Previously reported incident. Thirty miles north of Truth or Consequences, NM. Active fire behavior with short crown runs, uphill runs and backing. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Isolated dry storms will be possible across northeastern portions of California, south central Oregon, and northwestern Nevada as a low pressure area off the Pacific Coast moves closer to the coastline. The strong high pressure ridge over the West will strengthen over the Great Basin and will allow for further warming. Single digit humidities will be possible as far north as northern Nevada. The stalled cold front along the Continental Divide will drift further south and will allow for the convection along the crest to spread into across the eastern half of New Mexico. In Alaska, warm and dry conditions are expected across the state as high pressure strengthens over the Interior and begins to move east.

Driving Safety

Vehicles/Roads Category

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives – we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- To be a safe driver you have to *want* to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
 - Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
 - Many things can lure our attention away from our driving such as fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle, and music.
-
- ✓ Drive only when you are well-rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10- to 15-minute break after every 2 hours.
 - ✓ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
 - ✓ Never drive when taking medications that make you drowsy.
 - ✓ Delegate navigation and communication to a passenger or pull over.
 - ✓ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
 - ✓ Avoid eating or drinking while driving.
 - ✓ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
 - ✓ Switch off driving with others if multiple people are in the vehicle.
 - ✓ Do not be in a hurry, be patient.
-
- Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.
