

National Interagency Coordination Center
Incident Management Situation Report
Monday, May 11, 2020 – 0800 MT
National Preparedness Level 1

National Fire Activity May 8 – May 10, 2020

Initial attack activity:	Light (327 new fires)
New large incidents:	6
Large fires contained:	2
Uncontained large fires:***	5
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 6 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

This report will be posted Monday – Friday at 0800 Mountain time unless significant activity occurs.

NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington D.C.

Southern Area (PL 1)

New fires:	71
New large incidents:	5
Uncontained large fires:	4
Type 2 IMTs committed:	1

5 Mile Swamp, Florida Forest Service. IMT 2 (FL Forest Service Blue Team). Two miles south of Milton, FL. Southern rough and brush. Minimal fire behavior with creeping and smoldering.

Moonfish, Big Cypress National Preserve, NPS. Thirty-two miles southwest of Doral, FL. Hardwood litter and tall grass. Moderate fire behavior with backing and creeping. Numerous structures threatened. Evacuations and road closures in effect.

* **TL White Gap**, National Forests in Alabama. Ten miles east of Sylacauga, AL. Timber. Minimal fire behavior. Structures threatened. Trail closures in effect.

343, Florida Forest Service. Ten miles west of Williston, FL. Timber. No new information.

Mud Dauber Trail, Florida Forest Service. Twelve miles northeast of Frostproof, FL. Southern rough. No new information.

* **Glendale Drive**, Florida Forest Service. Twenty miles southwest of Chipley, FL. Light logging slash. Extreme fire behavior. Last narrative report unless significant activity occurs.

Musset Bayou, Florida Forest Service. Eight miles east of Destin, FL. Southern rough. Minimal fire behavior. Reduction in acreage due to more accurate mapping. Last narrative report unless significant activity occurs.

* **County Line**, Florida Forest Service. Twelve miles northwest of Andytown, FL. Tall grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday. Last narrative report unless significant activity occurs.

TOTAL ACRES:		0	300	0	0	2,835	0	3,135

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: A strong but rapidly weakening low pressure area will approach the coast of the Pacific Northwest. As it does so, showers will spread inland across Northern California, Oregon, and Washington. Wet convection will be possible as far inland as Montana and Wyoming. Breezy and dry conditions will remain possible across the Great Basin. The Southwest will remain convective with mostly scattered wet storms. The focus of the Southwestern activity will be slightly further east over New Mexico, Colorado and West Texas. Morning showers will be possible across southern Florida as a cold front moves south across the state toward Cuba. In Alaska, high pressure will continue to produce warm and dry conditions. Isolated convection will be possible across the southern Interior in the afternoon.

Fatigue & Stress

Firefighter Health & First Aid

Accumulated (Chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below:

- Behavioral indicators:
 - Decreased motivation and low morale.
 - Increased irritability and depression.
- Physiological indicators:
 - Confused, poor problem solving.
 - Poor abstract thinking.
 - Poor attention/decisions.
 - Poor concentration/memory.
 - Extreme emotional responses.
 - Social/behavioral changes.
- Recommendations for chronic fatigue/stress are:
 - Take longer periods of rest/recovery.
 - Ensure that workers are adequately rested before they begin work shifts.
 - Provide periodic rest breaks to allow physical and mental recovery.
 - Alternate between heavy and light tasks.
 - Eat well-balanced meals regularly, with energy supplements during periods of high exertion.
 - Maintain hydration.
 - Ensure workers maintain good personal hygiene.
 - Maintain high standards of physical fitness and work capacity.
 - In extreme cases, personnel may need to be relieved of their duties.
