

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, May 19, 2020 – 0800 MT
National Preparedness Level 1**

National Fire Activity:

| | |
|-------------------------------|-----------------------|
| Initial attack activity: | Light (103 new fires) |
| New large incidents: | 2 |
| Large fires contained: | 1 |
| Uncontained large fires:*** | 11 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 1 |

Nationally, there are 3 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

This report will be posted Monday – Friday at 0800 Mountain time unless significant activity occurs.

NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington D.C.

Southern Area (PL 2)

New fires: 13
 New large incidents: 0
 Uncontained large fires: 6
 Type 2 IMTs committed: 1

36th Ave SE, Florida Forest Service. IMT 2 (FL Forest Service Green Team). Sixteen miles east of Naples, FL. Southern rough, timber and brush. Minimal fire behavior with creeping, smoldering and backing. Structures threatened.

Moonfish, Big Cypress National Preserve, NPS. Thirty-two miles southwest of Doral, FL. Hardwood litter and tall grass. Minimal fire behavior with creeping and smoldering. Numerous structures threatened.

High Hill, National Forests in Florida, USFS. Three miles northeast of Flagler Beach, FL. Southern rough. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

5 Mile Swamp, Florida Forest Service. Two miles south of Milton, FL. No new information.

Hurst Hammock, Florida Forest Service. Five miles west of Pensacola, FL. Southern rough. No new information. Last report unless new information is received.

Musset Bayou, Florida Forest Service. Eight miles east of Destin, FL. Southern rough. No new information.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Critical fire weather conditions are expected across the Four Corner states as the upper level low pressure area over California moves into Nevada. Strong, gusty, southerly winds will develop and interact with low humidities over critically dry fuels. Widespread showers will continue across Idaho, northeastern Nevada, and Montana, while activity along the coast begins to diminish due to the approach of a high pressure ridge just off shore. Much cooler than average temperatures are expected across the Southeast as a strong upper level low pressure area remains parked over Tennessee and Kentucky. In Alaska, scattered showers are expected across the southern half of the state as a weakening system continues move inland.

ATV – Safety

Vehicles/Roads Category

The use of ATVs for wildland fire suppression and prescribed fire operations has increased dramatically over the last ten years. Note: Several agencies have required training for ATV operations (check your agency's requirements).

Most injuries associated with ATVs occur when:

- the driver loses control (When the operator encounters a change of terrain or swerves to avoid an obstacle, it causes an abrupt change of balance and loss of control),
- the vehicle rolls over,
- the driver or passenger is thrown off,
- the operator's loss of attention to what, where, and how an ATV is being operated,
- or there is a collision with a fixed object.

Identified contributing factors to ATV accidents include:

- rider inexperience,
- excessive speed combined with rough terrain, can create enough pitch and bounce to cause the operator to lose control of the vehicle,
- lack of helmet use,
- the ATV is improperly loaded or load weight exceeds vehicle operation capacity,
- or the operator carries a passenger that affects the operator's control and operation of the ATV.

Safety measures for ATV use include:

- Conduct pre-ride inspection which should include checking tires, throttle cable, front and rear brakes, lights and switches, oil and fuel, chain or driveshaft, air filter, clean out of weeds and other debris from around engine and other hot components, and the chassis for any defects or wear.
- Single riders only – Injuries frequently occur to passengers, therefore riding double should not be permitted.
- Always wear PPE – helmets, eye protection, and protective clothing. Appropriate helmets are those designed for motorcycle (not firefighting) use and should include safety visors/face shields, goggles, or safety glasses for eye protection.
- Use headlights to improve visibility by other vehicles.
- Maintain speeds acceptable for riding conditions, especially over uneven terrain.
- Traversing slopes should be avoided.
- Mounted or towed loads should not exceed the manufacturer's recommendation and should be properly mounted so that weight transfer does not affect the center of gravity of the machine – mounting a tank (e.g., drip torch) on the rear of the vehicle increases the chances for a rear turnover.
- Do not drive on public roads – collisions with automobiles on public roads are the most common cause of fatal ATV accidents. It may be illegal to operate an ATV on public roads – check your state's laws.
