Predictive Services Discussion: An upper-level shortwave trough will begin to flatten the ridge over the West with precipitation expected along and west of the Cascades in Washington and Oregon. There are chances for scattered precipitation in portions of the Inland Pacific Northwest, Idaho Panhandle, and northwest Montana as well. An upper low will slowly move eastward from central California into the Great Basin and Southwest and weaken. Isolated showers and lightning are likely in portions of the Great Basin, especially central Utah. Dry conditions will continue across the Southeast.

Operational Briefings

Fire Communications Category

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the inside back cover of the *Incident Response Pocket Guide*, PMS 461:

- Situation:
 - Fire name, location, map orientation, other incidents in the area.
 - Terrain influences.
 - Fuel type and conditions.
 - Fire weather (previous, current, and expected).
 - Fire behavior (previous, current, and expected).
- Mission/Execution:
 - Command (Incident Commander/immediate supervisor).
 - Leader's intent.
 - Specific tactical assignments.
 - Contingency plans.
- Communications:
 - Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.).
 - Medevac Plan.
- Service/Support:
 - Other resources that may be working adjacent to you and those available to order.
 - Aviation operations.
 - Logistics (e.g., transportation, supplies, equipment).
- Risk Management:
 - Identify known hazards and risks.
 - Identify control measures to eliminate hazards and reduce risk.
 - Identify trigger points for disengagement or reevaluation of operational plan.
