

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, November 10, 2020 – 0730 MDT
National Preparedness Level 1**

National Fire Activity:

Initial attack activity:	Light (33 new fires)
New large incidents:	3
Large fires contained:	3
Uncontained large fires:***	17
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	4

Nationally, there are 15 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

NIMO (Reinarz) has been assigned to provide wildland fire support to California.

This will be the last daily Incident Management Situation Report. This report will post every Friday at 0800 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

Southern California Area (PL 2)

New fires: 7
 New large incidents: 0
 Uncontained large fires: 4
 Type 2 IMTs committed: 2

Creek, Sierra NF, USFS. IMT 2 (AK Black Team). Thirty-five miles northeast of Clovis, CA. Timber, chaparral and tall grass. Minimal fire behavior with creeping and smoldering. Numerous structures and energy infrastructure threatened. Area, road and trail closures in effect.

SQF Complex, Sequoia NF, USFS. IMT 2 (CA Team 13). Thirty-three miles east of Porterville, CA. Timber and chaparral. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

El Dorado, San Bernardino Unit, Cal Fire. Three miles northeast of Yucaipa, CA. Timber, chaparral and brush. Minimal fire behavior with creeping, backing and smoldering. Numerous structures threatened. Area and trail closures in effect.

Coleman, Los Padres NF, USFS. Thirteen miles southwest of King City, CA. Brush and tall grass. No new information.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: An upper-level shortwave trough will move northeast from the Plains into the Great Lakes as another upper low moves east-southeast into Pacific Northwest and Northern Rockies. A cold front will push southeast through Texas and east through the Midwest and into the Great Lakes with winter precipitation spreading from Nebraska into the western Great Lakes. A few stronger thunderstorms are also likely along the cold front in the Mid-Mississippi Valley into the Great Lakes. Deeper moisture will be drawn into the Southeast and northward to the Ohio Valley and portions of the Mid-Atlantic with showers and thunderstorms likely. Rain and snow are expected across the Pacific Northwest, Northern Rockies, and into the northern Great Basin.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Initial Attack Sizeup/Safety

Operational Engagement Category

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

Use the following reporting factors for sizeup and reference local fire sizeup cards. Discuss others that may be used.

- Fire name and location.
- Terrain (slope, aspect, elevation) and position of fire on the slope.
- Size of fire.
- Fuel type, anticipated control problems, and spread potential.
- Values threatened.
- Weather conditions (wind speed and direction).
- Fire behavior.
- Resources on the fire and those needed.
- Estimated containment and control times.
- Cause (known, suspected, under investigation).

After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.

- Have you sized up the fire and relayed the information to dispatch?
- Is the observed fire weather consistent with the forecast?
- Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
- Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
- Are lookouts in place or can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Do you have a complete list of what resources have been ordered for the fire?
- Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
