

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, October 13, 2020 – 0730 MDT
National Preparedness Level 4**

National Fire Activity:

Initial attack activity:	Light (68 new fires)
New large incidents:	5
Large fires contained:	4
Uncontained large fires:***	39
Area Command teams committed:	1
NIMOs committed:	2
Type 1 IMTs committed:	9
Type 2 IMTs committed:	12

Nationally, there are 37 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 4)

New fires:	15
New large incidents:	0
Uncontained large fires:	11
Area Command:	1
Type 1 IMTs committed:	6
Type 2 IMTs committed:	3

August Complex (2 fires), Mendocino NF, USFS. Area Command Team (Stutler), IMT 1 (GB Team 1), IMT 1 (SW Team 1) and IMT 1 (GB Team 2). Fourteen miles northwest of Elk Creek, CA. Timber, chaparral and tall grass. Moderate fire behavior with backing, creeping and smoldering. Several communities and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Slater, Klamath NF, USFS. IMT 2 (NW Team 7). IMT is also managing the Devil fire. Five miles northeast of Happy Camp, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Devil, Klamath NF, USFS. Five miles north of Seiad, CA. Timber. Minimal fire behavior with creeping and smoldering. Area and trail closures in effect. Precipitation occurred over the fire area yesterday.

August Complex West Zone, Mendocino Unit, Cal Fire. IMT 1 (Cal Fire Team 5). Four miles northeast of Covelo, CA. Timber, chaparral and tall grass. Minimal fire behavior with backing, creeping and smoldering. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. Transfer of command from IMT 2 (NW Team 10) to IMT 2 (CA Team 12) will occur today. miles northeast of Willow Creek, CA. Timber. Moderate fire behavior with flanking, backing and creeping. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

North Complex, Plumas NF, USFS. IMT 1 (CA Team 4). One mile southwest of Crescent Mills, CA. Timber and brush. Minimal fire behavior with creeping, backing and smoldering. Area, road and trail closures in effect.

Glass, Sonoma-Lake Napa Unit, Cal Fire. Transfer of command from IMT 1 (Cal Fire Team 3) back to the local unit will occur today. Thirteen miles northwest of Napa, CA. Tall grass, brush and timber. Minimal fire behavior with smoldering. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Fork, Eldorado NF, USFS. Fifteen miles northeast of Pollock Pines, CA. Timber and brush. Minimal fire behavior with smoldering. Numerous structures and energy infrastructure threatened. Area, road and trail closures in effect.

Zogg, Shasta-Trinity Unit, Cal Fire. Nine miles southwest of Redding, CA. Chaparral, brush and short grass. Minimal fire behavior.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Another weather disturbance will move through the northwestern US bringing another round of widespread precipitation to Washington, Oregon, central/northern Idaho, Montana, and western Wyoming. These areas will also see gusty westerly winds, though relative humidity will be above critical values and critical fire weather conditions are not expected. High pressure building over Southern California will bring slightly warmer and drier conditions to the Southwest.

Escape Routes 2

Operational Engagement Category

Escape Routes are the path the firefighter takes from their current locations – when exposed to danger – to an area free from danger. Notice that escape routes is used instead of escape route(s). Unlike the other components, there always must be more than one escape route available to the firefighter.

Escape routes are probably the most elusive component of LCES. Their effectiveness changes continuously. As the firefighter works along the fire perimeter, fatigue and spatial separation increase the time required to reach the safety zone.

The most common escape route (or part of an escape route) is the fireline. On an indirect or parallel fireline, situations become compounded. Unless safety zones have been identified ahead, as well as behind, firefighters retreat may not be possible.

- Have you ever timed an escape route? If not, how do you judge its effectiveness?
- Describe a time when you were uncomfortably distant from your escape route.
- Describe a method you have used to communicate an escape route to your crews.
