

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, October 14, 2020 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (58 new fires)
New large incidents:	0
Large fires contained:	4
Uncontained large fires:***	37
Area Command teams committed:	1
NIMOs committed:	2
Type 1 IMTs committed:	7
Type 2 IMTs committed:	13

Nationally, there are 35 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 4)

New fires:	13
New large incidents:	0
Uncontained large fires:	10
Area Command:	1
Type 1 IMTs committed:	5
Type 2 IMTs committed:	3

August Complex (2 fires), Mendocino NF, USFS. Area Command Team (Stutler), IMT 1 (GB Team 1), IMT 1 (SW Team 1) and IMT 1 (GB Team 2). Fourteen miles northwest of Elk Creek, CA. Timber, chaparral and tall grass. Moderate fire behavior with backing, creeping and smoldering. Several communities and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Slater, Klamath NF, USFS. IMT 2 (NW Team 7). IMT is also managing the Devil fire. Five miles northeast of Happy Camp, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

Devil, Klamath NF, USFS. Five miles north of Seiad, CA. Timber. Minimal fire behavior with creeping and smoldering. Area and trail closures in effect.

August Complex West Zone, Mendocino Unit, Cal Fire. Transfer of command from IMT 1 (Cal Fire Team 5) back to the local unit will occur tomorrow. Four miles northeast of Covelo, CA. Timber, chaparral and tall grass. Minimal fire behavior with flanking, creeping and smoldering. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. IMT 2 (CA Team 12). Fourteen miles northeast of Willow Creek, CA. Timber. Active fire behavior with flanking, backing and isolated torching. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

North Complex, Plumas NF, USFS. IMT 1 (CA Team 4). IMT 2 (CA Team 11) mobilizing. One mile southwest of Crescent Mills, CA. Timber and brush. Minimal fire behavior with backing and smoldering. Area, road and trail closures in effect.

Fork, Eldorado NF, USFS. Fifteen miles northeast of Pollock Pines, CA. Timber and brush. Minimal fire behavior with smoldering. Numerous structures and energy infrastructure threatened. Area, road and trail closures in effect.

Glass, Sonoma-Lake Napa Unit, Cal Fire. Thirteen miles northwest of Napa, CA. Tall grass, brush and timber. Minimal fire behavior with smoldering. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: High pressure will continue to build across the western US bringing warmer and drier conditions to the Pacific Northwest, California, Great Basin and the Southwest. As a result, moderately strong northerly and offshore winds will develop across California Wednesday morning. Winds will be strongest across Northern and Central California. Widespread gusty winds are expected across Montana, Wyoming, Colorado, and the Central and High Plains. Though gusty winds are expected, relative humidity will be marginally critical across all but southern Colorado and the Southwest. Rain and snow showers will continue across the far northern US from the Pacific Northwest, through northern Idaho, Montana and into the northern Great Plains.

ESCAPE ROUTES 3

Operational Engagement Category

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following during discussion of escape from possible entrapment.

- Have a plan that includes trigger points!
 - **Trigger Point:** An observable event that triggers a pre-determined action.
Example: Temperature reaches 98 Degrees and RH goes into single digits, the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
 - Has access to escape routes become more difficult as the day progresses?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
- During an escape, time will be short. Describe considerations you might make in this situation such as:
 - Maintain control of all critical equipment such as PPE and radio... jettison gear that will not aid in your escape!
 - Maintain contact with all other crewmembers!
- Describe your vision of a good safety zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to safety zones and deployment areas.
