Predictive Services Discussion: An upper-level trough will continue to drive south over the West with cold temperatures moving in behind a cold front pushing through the Intermountain West. Precipitation will spread across the central Rockies, northern and central Plains, and into portions of the Great Basin and southern Rockies with much of the precipitation falling as snow. Light showers are also expected over portions of the higher terrain in southern California and southern Great Basin with a rain/snow mix in the southern Sierra. Strong, dry offshore and northerly winds are expected across much of northern California into far southwest Oregon through tonight. Showers and thunderstorms are expected across much of the Southeast into the Mid-Atlantic along a cold front.

Hypothermia

Firefighter Health & First Aid

Hypothermia occurs when your core body temperature falls below normal. It can easily happen in cold winds or wetness. Hypothermia can also occur in moderately cool temperatures, particularly if coupled with dehydration. People tend to forget to drink on cool, wet days and can get hypothermic even when the temperature stays well above freezing.

● Symptoms of hypothermia include:

- Slurred speech.
- Weakness and loss of coordination.
- Confusion.
- Irrational behavior.
- Uncontrollable shivering (although, at extremely low body temperatures, shivering may stop).
- Pale and cold skin.
- Drowsiness – especially in more severe stages.
- Slowed breathing or heart rate.

Your body automatically begins to shiver to warm itself. As your energy is used up to keep warm, you may reach a point where your body will be unable to warm itself. If left untreated, your body will gradually shut down; and you can die.

● You can avoid hypothermia with the following precautions:

- Guard against dehydration.
- Avoid fatigue.
- Avoid cold winds.
- Take precautions, change out of wet clothes.
- Be aware of the symptoms and take action upon their onset.

● If you recognize hypothermia, take the following steps:

- Move the patient to shelter.
- Remove wet clothes and replace them with warm, dry garments.
- If the victim is alert, give them food and warm liquids to drink.
