

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, September 1, 2020 – 0730 MDT
National Preparedness Level 5**

National Fire Activity:

Initial attack activity:	Light (80 new fires)
New large incidents:	4
Large fires contained:	3
Uncontained large fires:***	81
Area Command teams committed:	1
NIMOs committed:	2
Type 1 IMTs committed:	20
Type 2 IMTs committed:	14

Nationally, there are 18 large fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 5)

New fires:	16
New large incidents:	0
Uncontained large fires:	29
Area Command:	1
Type 1 IMTs committed:	8
Type 2 IMTs committed:	3

Area Command Team (Jalbert) has been mobilized to Northern California to support COVID-19 mitigation planning and the mobilization of international personnel.

CZU Aug Lightning Complex (4 fires), San Mateo-Santa Cruz Unit, Cal Fire. IMT 1 (Cal Fire Team 3). Eight miles east of Pescadero, CA. Timber, brush and closed timber litter. Active fire behavior with backing, creeping and smoldering. Numerous residences and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

LNU Lightning Complex (3 fires), Sonoma-Lake Napa Unit, Cal Fire. IMT 1 (Cal Fire Team 2). Two miles north of Barro, CA. Chapparal, tall grass and timber. Active fire behavior with short-range spotting, uphill runs and creeping. Numerous structures, energy and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

SCU Lightning Complex (2 fires), Santa Clara Unit, Cal Fire. IMT 1 (Cal Fire Team 6). Five miles southwest of Brentwood, CA. Tall grass and chapparal. Moderate fire behavior with flanking, backing and creeping. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

North Complex (2 fires), Plumas NF, USFS. IMT 1 (CA Team 1). IMT 1 (CA Team 4) mobilizing. IMT is also managing the Sheep fire. One mile southwest of Crescent Mills, CA. Timber, short grass and brush. Active fire behavior with torching, creeping and spotting. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Sheep, Plumas NF, USFS. IMT 2 (CA Team 10) mobilizing. Thirteen miles east of Westwood, CA. Timber, short grass and chaparral. Moderate fire behavior with flanking, backing and creeping. Sage-grouse habitat threatened. Area, road and trail closures in effect.

August Complex (6 fires), Mendocino NF, USFS. IMT 1 (SA Blue Team). Fourteen miles northwest of Elk Creek, CA. Timber, brush and medium slash. Active fire behavior with uphill runs, torching and flanking. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Butte/Tehama/Glenn Complex (7 fires), Butte Unit, Cal Fire. IMT 1 (Cal Fire Team 4). Two miles northwest of Oroville, CA. Timber, brush and tall grass. Active fire behavior with torching. Numerous residences and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

W-5 Cold Springs, Northern California District, BLM. IMT 2 (CA Team 13). Eleven miles east of Madeline, CA. Timber and brush. Moderate fire behavior with uphill runs, single tree torching and flanking. Sage-grouse habitat threatened. Area, road and trail closures in effect.

Woodward, Point Reyes National Seashore, NPS. IMT 1 (NR Team 2). Three miles southwest of Olema, CA. Timber, brush and chaparral. Active fire behavior with flanking, backing and creeping. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. IMT 2 (GB Team 5). Fourteen miles northeast of Willow Creek, CA. Timber, chaparral and short grass. Active fire behavior with uphill runs, flanking and torching. Structures threatened. Area, road and trail closures in effect.

Slink, Humboldt-Toiyabe NF, USFS. IMT 2 (GB Team 6) mobilizing. Three miles west of Coleville, NV. Timber, brush and short grass. Extreme fire behavior with wind-driven runs, spotting and long-range spotting. Numerous structures and sage-grouse habitat threatened. Area and road closures in effect.

Buck, Boise NF, USFS. Thirty miles northeast of Cascade, ID. Timber. Minimal fire behavior with backing, creeping and smoldering. Structures threatened. Area and road closures in effect.

Porphyry, Payette NF, USFS. Twenty miles north of Yellow Pine, ID. Timber. Active fire behavior with isolated torching and creeping.

* **Phinney Lake**, Ashley NF, USFS. Twenty-two miles northeast of Hanna, UT. Timber litter and understory. Moderate fire behavior with spotting and backing. Area and trail closures in effect. Last narrative report unless significant activity occurs.

Predictive Services Discussion: An upper-level trough will continue to move southeast over the Intermountain West with a cold front sliding into the Southwest. Another cold front will move south over the northern Plains with dry and breezy conditions likely across portions of the northern High Plains. Thunderstorms remain likely across portions of the Southwest and southern Rockies into Texas where severe thunderstorms are possible. Thunderstorms are also likely to form along and ahead a front from the eastern Great Lakes through the Ohio and Mid-Mississippi Valleys. Diurnal thunderstorms are also likely across much of the Southeast as warm and humid conditions remain. Temperatures will continue to increase across California and into the Pacific Northwest as an upper-level ridge builds over the region and a thermal trough extends northward through California.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Sundance Fire

Incident Summary: The Sundance Fire is remembered for its extreme fire behavior and on September 1, 1967 a crown fire, in heavy timber, pushed this fire 16 miles in a single burning period. **Two firefighters perished** in the blowup event.

Factors Influencing Fire Behavior: Lightning started several fires in mid-August of 1967 in the Selkirk Mountains of northern Idaho. The area was in moderate drought, with the last wetting rain in June, and fire danger was classified as extreme. Fuels in this mountainous area were mostly comprised of timber, but also included areas of logging slash. One fire that ignited near the west side of the summit of Sundance Mountain spread relatively slowly at the outset, growing to only 35 acres by August 23. On August 29-30, this Sundance Fire made a major downhill run towards Priest Lake, pushed by strong northeast winds. By August 31, the fire was at 4,000 acres. On September 1, a dry cold front with very strong southwest winds moved over the fire area. The fire weather forecast issued at 0800 that morning called for scattered afternoon and evening thunderstorms, temperatures down 5 degrees, humidity up 5%, and south-southwest winds at 12-18 mph.

Human Factors and Fire Operations: In response to the fire's growth, a US Forest Service fire management team was ordered, and it assumed command of the incident at 1000 on September 1. Much of the focus was on the fire's movement to the west, as there was no imminent threat perceived of the fire spreading to the east and over the Selkirk Divide. Indeed, earlier that morning, a dozer with operator and Sector Boss (similar to [TFLD](#) or [STEQ](#) now) were deployed on that opposite side of the Divide, several miles northeast of the fire. Around 1100, they were briefed by a supervisor on work objectives and escape routes. The dozer was assigned to open up roads in the McCormick Creek drainage, starting near the Pack River and moving southwest and up canyon, towards the Selkirk Divide. Fault Lake, their designated safety zone, was 4 miles and 3,000 vertical feet further up the canyon, and work was to progress toward the safety zone. Due to limited supplies and equipment, the Sector Boss had neither a vehicle nor a two-way radio. The dozer operator had a knee injury that hampered his mobility.

The Blowup on September 1: Starting at 1300 with the onset of strong southwest winds, the Sundance Fire became very active, making a significant run up the Soldier Creek drainage, which is aligned mostly in a west to east direction, to the Selkirk Divide. Between 1400 and 1600, the fire crossed east over the Selkirk Divide and burned downslope through the southwest-to-northeast aligned McCormick Creek Canyon and then into the Pack River drainage, where the dozer had worked its way to within $\frac{1}{4}$ mile of Fault Lake. At 1600, the fire overran the dozer operator and Sector Boss, killing both. During this blowup event on September 1, the Sundance Fire experienced winds of 30 to 50 mph from early afternoon into the night. In the 9 hour period from 1400 to 2300, the fire increased by 50,000 acres and advanced 16 miles to the NE, with long range spotting up to 10 miles.

Discussion Points:

Prior to the blowup, there were signals of escalating risk.

Discuss the following:

- Given the predicted weather, extreme fire danger, and other factors, what are your concerns?
- The dozer operator was partially handicapped due to an injured knee. How would you handle an injury that limits your physical ability or that of a coworker?

- How did the alignment of general winds with major canyons and drainages affect fire behavior?
- The Sundance Fire was not predicted to spread into McCormick Creek. Once the fire advanced to the east side of the Divide, what actions would you take?
- Given similar circumstances, discuss how you and your crew could apply LCES throughout the day.
- In the [IRPG](#), review the "Human Factor Barriers to Situation Awareness" (page x) and discuss this in relation to the Sundance Fire.
