

**National Interagency Coordination Center
Incident Management Situation Report
Friday, September 4, 2020 – 0730 MDT
National Preparedness Level 5**

National Fire Activity:

Initial attack activity:	Light (76 new fires)
New large incidents:	3
Large fires contained:	1
Uncontained large fires:***	76
Area Command teams committed:	1
NIMOs committed:	3
Type 1 IMTs committed:	15
Type 2 IMTs committed:	15

Nationally, there are 24 large fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 5)

New fires:	13
New large incidents:	0
Uncontained large fires:	27
Area Command:	1
NIMOs committed:	1
Type 1 IMTs committed:	7
Type 2 IMTs committed:	4

Area Command Team (Jalbert) has been mobilized to Northern California to support COVID-19 mitigation planning and the mobilization of international personnel.

August Complex (5 fires), Mendocino NF, USFS. IMT 1 (SA Blue Team). Fourteen miles northwest of Elk Creek, CA. Timber, chaparral and tall grass. Active fire behavior with uphill runs, group torching and short-range spotting. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Butte/Tehama/Glenn Complex (7 fires), Butte Unit, Cal Fire. IMT 1 (Cal Fire Team 4). Two miles northwest of Oroville, CA. Timber, brush and tall grass. Moderate fire behavior with torching. Residences threatened. Evacuations, area, road and trail closures in effect.

North Complex (2 fires), Plumas NF, USFS. IMT 1 (CA Team 4). One mile southwest of Crescent Mills, CA. Timber, short grass and brush. Moderate fire behavior with flanking and backing. Structures threatened. Evacuations, area, road and trail closures in effect.

Sheep, Plumas NF, USFS. IMT 2 (CA Team 10). Thirteen miles east of Westwood, CA. Timber, chaparral and short grass. Minimal fire behavior with creeping, backing and smoldering. Area, road and trail closures in effect.

Woodward, Point Reyes National Seashore, NPS. IMT 1 (NR Team 2). Three miles southwest of Olema, CA. Timber, brush and chaparral. Active fire behavior with flanking, backing and creeping. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. IMT 2 (GB Team 5). NIMO (Quesinberry) and IMT 2 (CA Team 15) mobilizing. Fourteen miles northeast of Willow Creek, CA. Timber and grass. Active fire behavior with uphill runs, backing and torching. Community of Hoopa threatened. Area, road and trail closures in effect.

CZU Aug Lightning Complex (4 fires), San Mateo-Santa Cruz Unit, Cal Fire. IMT 1 (Cal Fire Team 3). Eight miles east of Pescadero, CA. Timber, chaparral and closed timber litter. Active fire behavior with backing, creeping and smoldering. Numerous residences and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

SCU Lightning Complex, Santa Clara Unit, Cal Fire. IMT 1 (Cal Fire Team 6). Five miles southwest of Brentwood, CA. Timber, chaparral and tall grass. Moderate fire behavior with running, creeping and smoldering. Area, road and trail closures in effect.

Hobo, Shasta-Trinity NF, USFS. Seven miles northwest of Junction City, CA. Timber, brush and short grass. Moderate fire behavior with flanking, backing and isolated torching. Residences threatened.

LNU Lightning Complex (2 fires), Sonoma-Lake Napa Unit, Cal Fire. IMT 1 (Cal Fire Team 2). Two miles north of Barro, CA. Timber, chaparral and tall grass. Minimal fire behavior with creeping and smoldering. Numerous structures, energy and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

W-5 Cold Springs, Northern California District, BLM. IMT 2 (CA Team 13). Eleven miles east of Madeline, CA. Timber and brush. Minimal fire behavior with flanking, backing and single tree torching. Sage-grouse habitat threatened.

Northern Rockies Area (PL 4)

New fires:	5
New large incidents:	2
Uncontained large fires:	11
Type 2 IMTs committed:	3

Huff, Garfield County. Started on private land four miles north of Jordan, MT. Timber, brush and tall grass. Active fire behavior with wind-driven runs, torching and smoldering. Structures and sage-grouse habitat threatened.

BobCat, Musselshell County. IMT 2 (NR Team 4). Seven miles southeast of Roundup, MT. Timber. Active fire behavior with wind-driven runs, group torching and backing. Numerous residences threatened. Evacuations, area and road closures in effect.

Sarpy, Crow Agency, BIA. Twenty-five miles east of Hardin, MT. Timber. Active fire behavior with single tree torching and creeping. Numerous structures threatened.

Snider, Rosebud County. Started on private land 20 miles north of Ashland, MT. Timber and tall grass. Active fire behavior with wind driven runs, smoldering and creeping. Numerous structures threatened.

Rice, Rosebud County. Started on private land six miles north of Ashland, MT. Timber and tall grass. Active fire behavior with wind-driven runs, smoldering and creeping. Numerous structures threatened.

* **Oil**, Rosebud County. Started on private land 53 miles northwest of Hysham, MT. Timber and short grass. Minimal fire behavior with smoldering and creeping.

Louse Creek, Judith Basin County. Six miles northeast of Moccasin, MT. Brush and short grass. Minimal fire behavior. Structures threatened.

* **Zook**, Custer County. Started on private land 30 miles south of Miles City, MT. Timber and tall grass. Moderate fire behavior with running and smoldering.

Whitetail Loop, Clearwater Potlatch Timber Protective Association, Idaho Department of Lands. Two miles north of Orofino, ID. Timber, brush and tall grass. Minimal fire behavior with smoldering and creeping. Residences and energy infrastructure threatened. Area and road closures in effect.

Cinnabar, Lolo NF, USFS. IMT 2 (NR Team 7). Twenty-one miles southeast of Missoula, MT. Timber and brush. Minimal fire behavior with creeping and backing. Structures threatened. Area, road and trail closures in effect.

Beaver, Nez Perce-Clearwater NF, USFS. IMT 2 (NR Team 6). IMT 2 is also managing Marion incident. Seven miles southeast of Powell Junction, MT. Timber. Moderate fire behavior with flanking, backing and uphill runs.

Marion, Nez Perce-Clearwater NF, USFS. Five miles south of Powell Junction, MT. Timber. Minimal fire behavior with creeping, isolated torching and smoldering. Trail closures in effect.

Bear Creek, Beaverhead-Deerlodge NF, USFS. Twenty-nine miles east of Salmon, ID. Timber. Moderate fire behavior. Area, road and trail closures in effect.

Drumming, Flathead NF, USFS. Twenty-three miles southeast of Essex, MT. Timber. Moderate fire behavior with group torching, flanking and backing. Trail closures in effect. Last narrative report unless significant activity occurs.

Garnet, Flathead NF, USFS. Previously reported incident. Thirty-four miles east of Polson, MT. Timber. Moderate fire behavior with torching, backing and flanking. Area and trail closures in effect. Last narrative report unless significant activity occurs.

Slink, Humboldt-Toiyabe NF, USFS. IMT 2 (GB Team 6). Three miles west of Coleville, NV. Timber, brush and short grass. Extreme fire behavior with crowning, spotting and uphill runs. Numerous structures and sage-grouse habitat threatened. Area and road closures in effect.

Buck, Boise NF, USFS. Thirty miles northeast of Cascade, ID. Timber. Moderate fire behavior with flanking, backing and group torching. Structures threatened. Area and road closures in effect.

Porphyry, Payette NF, USFS. Twenty miles north of Yellow Pine, ID. Timber. Active fire behavior with flanking. Last narrative report unless significant activity occurs.

Predictive Services Discussion: High pressure over the West, west of the Continental Divide will intensify further. This will lead to an extended period of near-record high temperatures across some areas. Impacts from this hot, dry, and unstable airmass will be increase fire behavior on western fires as significant plumes develop during the afternoon burn period. In addition, overnight humidity recoveries will continue to be poor to moderate. Valley temperature inversions will become difficult to break out of in the more narrow and deep canyons across the Pacific Northwest and northern California. Strong thermal belts will develop on the midslopes during the overnight period which will lead to active burning overnight. Looking elsewhere, the gusty northwesterly flow will move east across the Dakotas into the Upper Midwest. A cold front will linger along the East Coast and will allow for scattered storms to develop from New Hampshire southwest to Louisiana. The Carolinas, Georgia, and northern Florida will also see afternoon storms develop.

Bees and Wasps

Firefighter Health & First Aid

In general, bees sting to protect their hive and seldom sting when they are foraging unless they feel threatened (like being swatted at or stepped on). On the other hand, a large number of bees or wasps foraging in one area may indicate a colony is nearby. If you intend to work or camp in the area, scout the area for bee/wasp habitat first.

Colonies vary in behavior over time, especially with changes in season, becoming more aggressive and easily agitated in the late summer and fall. You may pass the same colony for weeks and then one day provoke them unexpectedly.

● **Look out for colonies:**

Bees and wasps nest in a wide variety of locations, such as pipes, holes, behind shutters, under shingles, within cracks and crevices in trees and rocks, and hanging from branches. Be alert for groups of flying bees entering or leaving an opening and listen for buzzing sounds. Be especially alert when climbing, digging fire line and moving logs. DO NOT put your hands where you can't see them.

Be particularly careful when using any heavy equipment that produces sound vibrations, such as chainsaws, weed eaters, and pumps. **Keep escape routes in mind.**

!!! If you disturb a nest and are being attacked, run away. Use your shroud or shirt to protect your head neck and face. Swatting and waving your arms aggravates bees/wasps more!

● **About Africanized and European honey bees:**

Honey bees are about 5/8-inch long, brown, hairy insects with black encircling their abdomen, giving them a subtle striped appearance. All honey bees look alike. Only an expert can tell them apart. The sting from a single Africanized honey bee is no more harmful than one from the common garden or European honey bee. Africanized honey bees are known as "killer bees" because they defend their nests more aggressively, with less provocation, and in larger numbers than the other honey bees, so there is a greater chance of receiving many stings.

Africanized honey bees are found in the southwest and are spreading across the south. You are more likely to be struck by lightning than being killed by Africanized bees.

● **Considerations with all bees and wasps:**

- 1) If a bee gets in the vehicle while you are driving. Stay calm, pull over and stop, let the bee out.
- 2) Keep trash away from your camp and keep it covered.
- 3) Look at what you are drinking and eating before you eat or drink. Bees and wasps are attracted to accessible food and water.

- **If you get Stung:**

The first thing you should do is remove the stinger. The end of a stinger is barbed and will remain stuck in the skin even if the bee is removed. Muscles in the stinger allow it to continue pumping venom into the victim, even if it is no longer connected to the bee. Do not pull the stinger out with your fingers or tweezers because this will squeeze out more venom. Instead, scrape the stinger out with your fingernail, the edge of a credit card, a dull knife blade, or another straight-edged object.

- **Two kinds of reactions are usually associated with bee stings and those of other stinging insects as well: (1) local or (2) systemic, allergic, or life-threatening.**

(1) Local Reactions:

A local reaction is usually characterized by pain, swelling, redness, itching, and a welt surrounding the wound made by the stinger. Swelling can sometimes be locally severe. For instance, if stung on the finger, the arm may be swollen even up to the elbow. Swelling such as this is fairly common, even though it may be alarming. Swelling may be reduced by cooling the wound and/or taking an antihistamine such as Benadryl. Topical solutions such as calamine may also help alleviate pain.

(2) Systemic, Allergic, or Life-Threatening Reactions:

Allergic reactions can develop anywhere on the body and may include rash or hives, dizziness or headache, cramps, nausea, vomiting, swelling **not** in the general area of the sting, shortness of breath or difficulty swallowing, shock, and unconsciousness. If you experience any of these symptoms, seek emergency medical assistance immediately. Symptoms can begin immediately following the sting or up to 30 minutes later and might last for hours.

- **If you know you are allergic:**

Anaphylaxis, if treated in time, usually can be reversed by epinephrine (adrenaline) injected into the body. Individuals who are aware that they are allergic to stings should carry epinephrine in either a normal syringe (sting kit) or an auto-injector (EpiPen) at all times when working outside **and communicate their allergy to supervisor/coworkers in case they become incapacitated.** Epinephrine is obtainable only by prescription from a physician.

- **Discussion Topics:**

- **Have you and your crew identified who is allergic to bee/wasp stings? Are they carrying their prescription EpiPen? Identify the EpiPen and its location to the rest of the crew.**
- **If you have an EMT on your crew/team, what are their protocols for treating stings and related allergic reactions?**
- **Discuss how you and your crew will safely flag or mark any identified nests/hives.**
