

**National Interagency Coordination Center
Incident Management Situation Report
Friday, April 16, 2021 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (145 fires)
New large incidents:	2
Large fires contained:	6
Uncontained large fires:***	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there is 1 fire being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Ten Year Average Acres (2011 – 2020 as of today)	649,576

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: An upper-level jet oriented northeast to southwest moving over the Northern Rockies and Pacific Northwest will strengthen downslope, offshore flow amid low relative humidity across Cascades and Coast Ranges in western Oregon and Washington today and tonight. A Red Flag Warning is in effect for portions of northwest Oregon as a result. Dry and breezy conditions are also likely in the Columbia Basin into portions of northern Oregon with downslope, offshore flow developing tonight across northern California in the Sierra and Coast Ranges. Lingering dry and windy conditions are expected across the Trans-Pecos and portions of southern New Mexico this afternoon. Rain and snow will continue across portions of the central High Plains into the central Rockies and Great Basin and likely into northern New Mexico. Heavy snow is likely in portions of New England as well with scattered to widespread thunderstorms in Texas and along the Gulf Coast.

SAFECOMs

Aviation Category

What the SAFECOM system is:

The Aviation Safety CommuniquØ (SAFECOM) [AMD-34/FS-5700-14](#) should be used to report any condition, observation, act, maintenance problem, or circumstance with personnel or the aircraft that has the potential to cause an aviation-related mishap. SAFECOMS are a tool used to identify, document, track, and correct safety-related issues.

What the SAFECOM system is not:

- NOT intended for initiating punitive actions.
- NOT to be used as a complaint system or for personal attacks.
- NOT used by contracting officers for contract evaluations/award purposes.
- NOT a substitute for on-the-spot corrections to a safety concern.
- Does NOT replace the requirement for initiating an accident or incident report.

SAFECOMS provide the necessary feedback for development of the following communication tools and documents:

- Accident Prevention Bulletins
- Lessons Learned
- Safety Alerts
- Technical Bulletins
- Airwards
- Information Sharing Memos
- Maintenance Deficiencies (Airworthiness Directives (AD), Service Bulletins (SB), etc.)
- Safety Trends
- Training Needs
