Predictive Services Discussion: An upper low will continue moving through the Northern Rockies and will be followed by another upper low moving into British Columbia. Windy and dry conditions are likely across much of the northern and eastern Great Basin into Wyoming, the Colorado West Slope, and along and east of the Continental Divide in Montana. Breezy conditions are also likely in Cascade gaps of Washington and across the Columbia Basin, but are likely to be moderated by cooler temperatures and higher relative humidity. Isolated to scattered mixed wet and dry thunderstorms are forecast across eastern Idaho, much of Montana, Wyoming, and Colorado with some of the storms capable of severe wind gusts. Isolated to scattered wetter thunderstorms are possible for southeast Arizona and much of New Mexico, and scattered showers are forecast west of the Cascades in Washington tonight. Showers and thunderstorms are likely across portions of the Upper Midwest and Great Lakes and near a frontal boundary across portions of the Gulf Coast and Atlantic Coast in the southeast US.

Taking A Nap Near The Fireline

Operational Engagement Category

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you, or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards (falling snags or rolling materials, etc.)? Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review these guidelines.
- Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fireline for uninterrupted rest.
- To reduce risks:
 - Keep lookouts posted and rotate them.
 - Communicate crew conditions and status to supervisor or chain-of-command contact.

Discuss ways to rest on the fireline and suggestions for methods to alternate shifts for more effective firefighting.
