

National Interagency Coordination Center
Incident Management Situation Report
Saturday, June 5, 2021– 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (124 fires)
New large incidents:	2
Large fires contained:	1
Uncontained large fires: ***	14
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 7 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	26
New large incidents:	1
Uncontained large fires:	8
Type 2 IMTs committed:	1

Mescal, Gila District Office, BLM. IMT 2 (SW Team 5). Twelve miles northeast of Hayden, AZ. Brush. Extreme fire behavior with wind-driven runs, running and flanking. Numerous structures threatened. Evacuations and road closure in effect.

* **Telegraph**, Tonto NF, USFS. Five mile southeast of Superior, AZ. Grass and brush. Extreme fire behavior with running, spotting and short-range spotting. Structures and energy infrastructure threatened. Evacuations, area and road closures in effect.

Wolf Draw, Santa Fe NF, USFS. Eleven miles northwest of Regina, NM. Timber. Minimal fire behavior with creeping and smoldering.

Sam, Gila District Office, BLM. Eight miles north of Bylas, AZ. Brush and grass. Minimal fire behavior with smoldering.

Sycamore Canyon, Papago Agency, BIA. Fifteen miles southeast of Sells, AZ. Grass and brush. Minimal fire behavior with creeping and smoldering. Structures threatened.

Warren, Coronado NF, USFS. Nine miles south of Portal, AZ. Grass and brush. Minimal fire behavior with smoldering.

Dog, Guadalupe Mountains NP, NPS. Thirty-four miles southwest of Whites City, NM. Timber and grass. Minimal fire behavior with smoldering. Structures threatened. Area and trail closures in effect.

McDonald Tank, Fort Apache Agency, BIA. Twenty-five miles southeast of Whiteriver, AZ. Timber, brush and grass. No new information.

Predictive Services Discussion: Dry and windy conditions are likely across the inland Pacific Northwest, northern Great Basin, northern Plains into the Upper Midwest, and Desert Southwest today. Well above normal to record setting temperatures are expected across the northern Plains into the Great Lakes again with continued hot and dry conditions from the Desert Southwest into northern California. Isolated to scattered drier thunderstorms are likely across the eastern Great Basin into western Colorado and the Four Corners region. Another round of strong to severe thunderstorms are likely across the northern Plains into the Upper Peninsula of Michigan. Showers and thunderstorms will continue across east Texas through the Lower Mississippi Valley with rain moving into western Washington and northwest Oregon.

FIRE SHELTER STIGMA

Operational Engagement Category

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to deploy their fire shelters. Being ready means more than just practicing deployments and having a fire shelter that is in ready condition. Being ready also means firefighters are mentally prepared to make the decision to deploy.

Firefighters have suffered burn injuries and severe smoke inhalation because they delayed fire shelter deployment due to apprehension.

We train and practice how to deploy our fire shelters—
so why do we hesitate to use them?

The apprehension often relates to the stigma that comes with fire shelters.

Firefighters who have deployed fire shelter have described this apprehension:

- Somebody screwed up!
- It's not a real deployment.
- Here comes the investigation!
- Am I in trouble?
- They're going to fire me!
- Should I really pull this shelter out?
- Am I overreacting?

Deploying a shelter does not need to be an unquestionable, last-second, life-saving event. If you feel your situation is uncertain and can be improved by deploying a shelter, use it.

The Fall 2011 edition of the Wildland Fire Lessons Learned Center's Two More Chains addresses this issue, <https://www.wildfirelessons.net/communities/community-home/librarydocuments/viewdocument?DocumentKey=b75fdee8-cd54-42e1-90bd-d2ff5690ed54>.

"Forest officials and seasoned firefighters involved with this incident all made the point that firefighters must not be reluctant to use the fire shelter or be intimidated about using it. They all said that a stigma currently is associated with fire shelter deployment. We must work past that stigma. . . . The decision to deploy is a positive decision."

Nuttall Complex Fire Shelter Deployment Review, December 2004
