

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Friday, June 18, 2021– 0730 MDT**  
**National Preparedness Level 3**

**National Fire Activity:**

Initial attack activity:	Light (164 fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires: ***	25
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	7

Nationally, there are 9 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

## Southwest Area (PL 4)

New fires:	25
New large incidents:	1
Uncontained large fires:	8
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

**Telegraph**, Tonto NF, USFS. IMT 1 (SW Team 2). Two miles southeast of Superior, AZ. Short grass, chaparral and brush. Moderate fire behavior with uphill runs, flanking and backing. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

**Pinnacle**, Coronado NF, USFS. IMT 2 (SW Team 3). Eighteen miles south of Bylas, AZ. Short grass, brush and timber. Active fire behavior with wind-driven runs, running and spotting. Residences threatened. Evacuations, area, road and trail closures in effect.

\* **Horton**, Apache-Sitgreaves NF, USFS. Five miles north of Hannigan, AZ. Timber and heavy slash. Active fire behavior with flanking and backing. Structures threatened.

**Rincon**, Sante Fe NF, USFS. IMT 2 (SW Team 4). Twenty-five miles northwest of Las Vegas, NM. Timber and brush. Minimal fire behavior with backing, creeping and smoldering. Area and trail closures in effect.

**Slate**, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Moderate fire behavior with isolated torching and smoldering.

**Winchester**, Southeast District, Arizona DOF. Twenty miles northeast of Benson, AZ. Short grass, brush and chaparral. Moderate fire behavior with smoldering and isolated torching. Energy infrastructure threatened.

**Cemetery**, Bernalillo District, New Mexico DOF. Two miles northeast of Bosque, NM. Timber, short grass and brush. Minimal fire behavior with smoldering.

**Cornville**, Coconino NF, USFS. Two miles east of Cornville, AZ. Brush and chaparral. No new information.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** Westerly flow aloft will continue across the Pacific Northwest and Northern Rockies with high pressure over southern half of the Intermountain West. Isolated to scattered dry thunderstorms are likely across portions of the Southwest and Great Basin into Colorado with isolated dry thunderstorms possible in the Sierra and southeast California. Hot and dry conditions will continue across the southern half of the Intermountain West and stretching through California into portions of the inland Pacific Northwest. Post-frontal dry and windy conditions are expected from the northern Plains through Minnesota into the western Great Lakes. Heavy rain will spread from the Alabama Gulf Coast to Galveston with severe weather likely from southern Iowa through western Pennsylvania.

## No Communication Link with Crewmembers or Supervisor

Fire Communication Category

Watch Out Situation #7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communication(s) be established?
  - Talk about how communications are set up on fires, including the variables that must be considered.
  - Review situations where communications were a problem. Discuss what was done to fix the problem.
  - Ask yourself, "Do we need a repeater setup or can an experienced firefighter act as a human repeater?"
- Is the communication triangle complete?
  - Review the communication triangle: speaker, message, and audience. Discuss where it comes up in the 10 Standard Fire Orders and the 18 Watch Out Situations.
  - Discuss ways that firefighters can maintain the communication triangle on the fireline.
- How can we reduce the risks?
  - If the situation is complex, wait until communications are in place.
  - Talk about the fires where crews had to leave the line, did not go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications in these situations.
  - Discuss scenarios in which communications could be disrupted. What are some possible solutions?
