**Predictive Services Discussion:** High pressure remains over the Pacific Northwest and Northern Rockies with very hot, record-setting temperatures for the Northwest, northern California, northern Great Basin, and portions of the Northern Rockies. High temperatures will remain very hot in the valleys with highs up to 115 and low relative humidity in the afternoon. It will begin to cool west of the Cascades, but highs will remain 15 to 20 degrees above normal. The edge of monsoon moisture will bring scattered mixed wet and dry thunderstorms to the Sierra, southern California, and southern Great Basin this afternoon. The deepest moisture will remain in eastern Arizona, New Mexico, and Colorado with wet thunderstorms and heavy rain possible. Heavy rains are likely in South Carolina and Georgia, as Tropical Storm Danny continues to move inland and weakens.

Peer Accountability

*Leadership Category*

Leaders create teams in which team members hold each other accountable. More than any system of reward and discipline, more than any policy, the commitment to respect teammates and peers and the unwillingness to let them down represents the most effective means of accountability. Peer accountability is an outgrowth of trust, respect and commitment. We set the example by demonstrating that team members can hold us accountable, encouraging them to give us feedback on our own performance in meeting stated goals.

Accountability to self and peers challenges team members to improve beyond perceived personal limitations and is often a catalyst to achieving personal breakthroughs.

#### **Discussion Points:**

- What expectations do you have as a team? As an individual?
- How does your team address unmet expectations?
- Can you share an example of when you exceeded perceived personal limits for the sake of your peers?
- What is the leader's role in a culture where peer accountability exists?
- What is meant by the term "constructive feedback"?
