

National Interagency Coordination Center
Incident Management Situation Report
Wednesday, May 5, 2021– 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (78 fires)
New large incidents:	0
Large fires contained:	2
Uncontained large fires: ***	9
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 2 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	4
New large incidents:	0
Uncontained large fires:	3
Type 1 IMTs committed:	0

Three Rivers, Lincoln NF, USFS. Transfer of command from IMT 1 (SW Team 2) back to the local unit occurred yesterday. Twelve miles northwest of Ruidoso, NM. Short grass and timber. Minimal fire behavior with creeping and smoldering. Numerous residences threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Flag, Colorado River District, BLM. Twelve miles southeast of Kingman, AZ. Chaparral and timber. Minimal fire behavior with smoldering. Area and trail closures in effect.

Bonito Rock, Fort Apache Agency, BIA. Fifteen miles southeast of Whiteriver, AZ. Timber and brush. Minimal fire behavior with creeping and smoldering. Road closures in effect.

TOTAL FIRES:		1,381	223	66	48	16,578	1,012	19,308
TOTAL ACRES:		86,201	12,445	23,361	8,491	318,509	75,539	524,548

Ten Year Average Fires (2011 – 2020 as of today)	17,077
Ten Year Average Acres (2011 – 2020 as of today)	900,816

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: An upper-level ridge will build over the West with broad troughing over the eastern US today. Well above average temperatures will develop across much of the West, especially from the Desert Southwest northward over the West Coast. Dry conditions will accompany these higher temperatures, but winds are likely to be light over much of the West. Scattered precipitation is likely over portions of the Plains, including isolated thunderstorms along the eastern slopes of the Rockies. Thunderstorms and rain are expected along the Gulf Coast and much of the Atlantic Coast.

Communications (LCES)

Fire Communications Category

Effective communication is a critical component of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
 - Knowledge of the radio issued to the individuals.
 - Net control, frequencies.
 - Line-of-sight restrictions.
 - Antenna polarization effect (direction of the antenna).
 - Minimizing noise interference.
 - Wide band vs. narrow band.
 - Potentially unfamiliar local jargon (e.g., Coulee, candlestick, fence post, etc.).
- How can you mitigate potential problems?
 - Implement effective communication procedures — be brief, use clear text and to-the-point messages.
 - Give a good comprehensive briefing. (Refer to the Briefing Checklist inside the back cover of the *Incident Response Pocket Guide* (IRPG), PMS 461).
 - Confirm that relayed information is received and understood.
 - Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; and solicitation of feedback).
 - Establish emergency check-in procedures.
 - Provide a minimum of four radios per 20-person firefighter crew.
- The Five Communication Responsibilities for all firefighters:
 - Brief others as needed.
 - Debrief your actions.
 - Communicate hazards to others.
 - Acknowledge messages.
 - Ask if you don't know.
