

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, October 3, 2021 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (38 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires: ***	34
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	9

Nationally, there are 31 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Sacramento, CA in support of wildland fire operations. Also supporting this aircraft are four ground controllers from multiple U.S. Air National Guard squadrons.

Northern California Area (PL 3)

New fires:	10
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5

Caldor, Eldorado NF, USFS. IMT 2 (CA Team 13). Sixteen miles northeast of Plymouth, CA. Timber, light slash and brush. Moderate fire behavior with flanking, backing and isolated torching. Several communities, numerous structures and infrastructure threatened. Area, road and trail closures in effect.

Dixie, Butte Unit, Cal Fire. IMT 2 (SA Gold Team) and IMT 2 (GB Team 3). Fifteen miles northeast of Paradise, CA. Timber and brush. Moderate fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect.

River Complex, Klamath NF, USFS. IMT 2 (CA Team 15). Nine miles southwest of Etna, CA. Timber and brush. Moderate fire behavior with flanking, backing and smoldering. Several communities, numerous structures and infrastructure threatened. Area and trail closures in effect.

Monument, Shasta-Trinity NF, USFS. IMT 1 (SA Red Team). One mile southwest of Del Loma, CA. Timber and brush. Minimal fire behavior with smoldering, creeping and backing. Community of Trinity Village, numerous structures and infrastructure threatened. Area, road and trail closures in effect.

McCash, Six Rivers NF, USFS. Transfer of command from IMT 1 (AK Team 1) to IMT 2 (CA Team 10) will occur today. Fourteen miles northeast of Somes Bar, CA. Timber, closed timber litter and brush. Minimal fire behavior with creeping and smoldering. Evacuations, area, road and trail closures in effect.

Antelope, Klamath NF, USFS. Twenty miles northeast of McCloud, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

YNP – Yosemite NP, NPS

Northwest Area (PL 3)

New fires:	4
New large incidents:	0
Uncontained large fires:	11
Type 2 IMTs committed:	2

Cougar Peak, Fremont-Winema NF, USFS. Transfer of command from IMT 2 (NW Team 12) back to the local unit will occur 10/5. Fifteen miles northwest of Lakeview, OR. Timber, brush and medium slash. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

Rough Patch Complex (4 fires), Umpqua NF, USFS. IMT 2 (RM Blue Team). IMT is also managing the Jack incident. Eighteen miles southwest of Oakridge, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Jack, Umpqua NF, USFS. Thirty-one miles east of Roseburg, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

Devil's Knob Complex, Umpqua NF, USFS. Twenty miles northeast of Azalea, OR. Timber and hardwood litter. Minimal fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect.

Schneider Springs, Okanogan-Wenatchee NF, USFS. Eighteen miles northwest of Naches, WA. Short grass, timber and brush. Minimal fire behavior with smoldering and creeping. Area, road and trail closures in effect.

Bull Complex, Mt. Hood NF, USFS. Twenty-five miles northeast of Mill City, OR. Timber and closed timber litter. Moderate fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect.

Twenty-five Mile, Okanogan-Wenatchee NF, USFS. Twelve miles northwest of Chelan, WA. Short grass, brush and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

Middle Fork Complex, Willamette NF, USFS. Nine miles northeast of Oakridge, OR. Timber and light slash. No new information.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: Weak ridging will remain over the West, with stronger westerly flow aloft over the Pacific Northwest and a cutoff low off the southern California and Baja California coasts. Upper-level troughing will develop over the Great Lakes and into the Lower Mississippi Valley and Southeast. A cold front will push into south and east Texas and extend northeast through the Ohio Valley, while a Pacific cold front moves into the Pacific Northwest. Dry and breezy conditions are likely to continue in portions of Montana east of the Rockies as downslope flow remains. Light to breezy offshore winds are also possible in portions of the Transverse Ranges of southern California. Dry conditions are expected in much of California, the western and northern Great Basin, and southwest Montana through the northern High Plains, with mostly above normal temperatures. Isolated showers are likely in western Washington and southern Colorado, with scattered to widespread showers and thunderstorms along and ahead of the cold front from south Texas extending northeast into Michigan and to the western slopes of the Appalachians.

Hydration

Firefighter Health & First Aid

Dehydration is the result of the body trying to regulate its temperature naturally through sweating. Maintaining body fluids is essential for sweating. You must hydrate before, during, and after work.

- Studies conducted on wildland firefighters indicate that during fire suppression activities firefighters need to drink a minimum of one quart of fluid each hour of work.
- Before work, you should take extra fluids to prepare for the heat. Drink one or two cups of water, juice, or a sports drink before work.
- While working, drink at least one quart of fluid per hour. Drink as much as you can during the lunch break. Water is your greatest need during work in the heat.
- Hyponatremia (abnormally low concentration of sodium in the blood) as a result of excessive water intake is a potentially life-threatening complication. It can be prevented when hydration is enhanced by electrolytes, through fluids or food containing sodium and potassium.
- After work, it is important to continue drinking to replace fluid losses. Thirst always underestimates fluid needs, so you should drink more than you think you need.
- Unacclimatized workers lose more salt in the heat, so they need to pay particular attention to salt replacement.
- Don't overdo salt intake. Excessive salt can impair temperature regulation and cause stomach distress, fatigue, and other problems.
- You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine or painful urination indicate a serious need for rehydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue, and dizziness.
- Rapid loss of several pounds of body weight is a certain sign of dehydration. Rehydrate before returning to work; working in a dehydrated state can lead to serious consequences, including heat stroke, muscle breakdown, and kidney failure.

Discussion Points

- What are you doing right now to ensure that you are hydrated?
