One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Sacramento, CA in support of wildland fire operations. Also supporting this aircraft are four ground controllers from multiple U.S. Air National Guard squadrons.

Predictive Services Discussion: A mid-level shortwave trough will move northeast over the Great Basin onto the northern High Plains, with a cutoff low moving onshore in southern California and strong upper-level troughing beginning to move into the Pacific Northwest. An upper-level trough over the ArkLaTex and Lower Mississippi Valley will transition into a cutoff low, with ridging over the Rockies, southern and central High Plains, and into the western Great Lakes. A cold front will stall from Lake Erie extending southwest through the Ohio, Tennessee, and Mississippi Valleys into south Texas, and a Pacific cold front will remain in the Pacific Northwest. Dry and breezy conditions are expected across portions of eastern Montana into the western Dakotas and northeast Wyoming. Additionally, dry and breezy conditions are likely in southwest Montana into central Montana, central Idaho, and along and east of the southern Cascades, possibly extending to the Sierra Front. Isolated to scattered showers and thunderstorms are likely over southern California, Arizona, and the southern Great Basin ahead of the cutoff low moving onshore. Thunderstorms are likely along and ahead of the cold front from the Gulf Coast through the Mid-Atlantic.

Extended Attack

Operational Engagement Category

After the initial size-up of the fire and/or transfer of command from an initial attack Incident Commander (IC), task yourself with answering the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the assigned resources and support functions associated with the fire?
- Can you control the fire with the resources available (either on the incident or en route) under expected conditions?
- Have you developed a plan to attack the fire?
 - Direct or indirect
 - Anchor points
 - Escape routes
 - Safety zones
 - Head or flank attack
 - Priority areas
- Have you communicated the plan to all personnel assigned to the incident, including new arrivals?
- Can you see the entire fire area? Do you have lookouts posted?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
 - If you are using the black, is it completely burned and without reburn potential?
- Are safety guidelines and the Standard Firefighting Orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of resources that have been ordered?
