**Predictive Services Discussion:** An upper low will move over southern California and transition into a weak mid-level trough as it moves northeast across the Great Basin. A strong upper-level trough will slowly move into the Pacific Northwest with troughing over the West. A cutoff low will spin over the Lower Mississippi Valley and slowly drift to the north. A stronger Pacific cold front will move through the Pacific Northwest and into northern California. Dry and breezy south-southwest winds are expected ahead of the Pacific cold front from central Oregon into northeast California and extending east-northeast across the northern Great Basin and through portions of Montana into the western Dakotas. Showers are expected in western Washington, western Oregon, and far northwest California, with isolated to scattered showers and thunderstorms in southern California, the Southwest, and the eastern Great Basin into the West Slope. A few strong to severe thunderstorms are possible in Arizona. Scattered to widespread showers and thunderstorms are likely across the Southeast from the Gulf Coast to the Ohio Valley and Mid-Atlantic.

## Fight Fire Aggressively, Having Provided for Safety First

Operational Engagement Category

Standard Firefighting Order #10 must be considered at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Are we making progress? Are we beating our heads against a wall? Is there a better way to get this done?
  - Give examples of when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Do we need to retreat and reevaluate?
  - Talk about how you dealt with times when you realized you were not making progress on a fire.
- Are lookouts posted? When you post lookouts, who would you choose to be a lookout, and where should they be located?
- Are communications prompt with crews and other resources?
  - Review the importance of effective communications on the fireline.
- Have escape routes and safety zones been established?
  - Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment?
  - Discuss how you evaluate the situation. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
  - Post lookouts.
  - Establish trigger points.
  - Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
