

National Interagency Coordination Center
Incident Management Situation Report
Monday, October 11, 2021 – 0730 MDT
National Preparedness Level 3

National Fire Activity:

Initial attack activity:	Light (28 fires)
New large incidents:	1
Large fires contained:	2
Uncontained large fires: ***	26
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	8

Nationally, there are 25 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Sacramento, CA in support of wildland fire operations. Also supporting this aircraft are four ground controllers from multiple U.S. Air National Guard squadrons.

Active Incident Resource Summary

Northern California Area (PL 3)

New fires:	10
New large incidents:	0
Uncontained large fires:	6
Type 2 IMTs committed:	6

Caldor, Eldorado NF, USFS. IMT 2 (CA Team 13). IMT 2 (GB Team 7) mobilizing. Sixteen miles northeast of Plymouth, CA. Timber, light slash and brush. Minimal fire behavior with backing, creeping and smoldering. Several communities, residences and infrastructure threatened. Area, road and trail closures in effect.

Dixie, Butte Unit, Cal Fire. IMT 2 (GB Team 3) and IMT 2 (CA Team 14). Fifteen miles northeast of Paradise, CA. Timber and brush. Minimal fire behavior with smoldering and creeping. Area, road and trail closures in effect.

River Complex, Klamath NF, USFS. Nine miles southwest of Etna, CA. Timber and brush. Active fire behavior with uphill runs, backing and creeping. Area and trail closures in effect.

Monument, Shasta-Trinity NF, USFS. IMT 2 (CA Team 11). One mile southwest of Del Loma, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Community of Trinity Village, numerous structures and infrastructure threatened. Area, road and trail closures in effect.

McCash, Six Rivers NF, USFS. IMT 2 (CA Team 10). Fourteen miles northeast of Somes Bar, CA. Timber, closed timber litter and brush. Minimal fire behavior with creeping and smoldering. Evacuations, area, road and trail closures in effect.

Antelope, Klamath NF, USFS. Twenty miles northeast of McCloud, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: A deep, strong upper low will move into southern Nevada today with another upper low over the central Plains moving northeast into Wisconsin tonight. An upper ridge will extend from the northern Gulf Coast into New England with a weak upper low remaining over the east coast of Florida. A cold front will move through the Mississippi River Valley while a strong Pacific cold front moves through the northern Plains, Rockies, and southern California into the Southwest. Critical conditions are forecast due to strong north winds across the Central Valley of California and Coast Ranges. Gusty southwest winds are forecast over Arizona with northwest winds over the Great Basin, but higher humidity and areas of precipitation are forecast. Showers with isolated thunderstorms are expected over much of the Great Basin, Four Corners, and Rockies with snow above 6,000 feet. Showers and thunderstorms are forecast across the Mid to Upper Mississippi Valley and western Great Lakes.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Thunderstorm Safety

Weather – Fire Behavior Category

Thunderstorms cause significant hazards for wildland firefighters, including downbursts. Downbursts can cause extreme fired lightning. When thunderstorm development is likely, lookouts should be aware of the signs.

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Situation Awareness: Sound waves move at different rates based on atmospheric conditions. Take the storm precautions below as soon as you hear thunder, not when the storm is upon you. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

Hazard Control:

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lie on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle metal hand tools or flammable materials in open containers.
