

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, October 13, 2021 – 0730 MDT  
National Preparedness Level 3**

**National Fire Activity:**

Initial attack activity:	Light (79 fires)
New large incidents:	2
Large fires contained:	1
Uncontained large fires: ***	28
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7

Nationally, there are 24 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Sacramento, CA in support of wildland fire operations. Also supporting this aircraft are four ground controllers from multiple U.S. Air National Guard squadrons.

\*\*\*Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

**Predictive Services Discussion:** Deep troughing will be over the Intermountain West, while an upper low moves through the northern Plains. Upper-level ridging will continue over the northern Gulf Coast, Appalachians, and Great Lakes, with a weak upper trough moving across New England. A cold front will move into the western Great Lakes and Mid-Mississippi Valley associated with a strong surface low before stalling over the southern Plains. Temperatures will continue to be below normal for much of the West. Gusty downslope west winds are possible across the New Mexico central mountain chain into the adjacent High Plains with breezy conditions possible in the Cascade Gaps and interior Northwest. Gusty north winds may develop over northern California tonight, focused on the northern Sacramento Valley. Snow will wind down over eastern Montana and Wyoming, with rain continuing over the northern Plains into the western Great Lakes and Iowa. Showers and thunderstorms are likely along the cold front from the Mid-Mississippi Valley into central Texas where heavy rain and flash flooding are likely. Scattered light showers with mountain snow are possible across the Northwest, northern Great Basin, and into western Montana.

## Hypothermia

*Firefighter Health & First Aid*

Hypothermia occurs when your core body temperature falls below normal. It can easily happen in cold winds or wetness. Hypothermia can also occur in moderately cool temperatures, particularly if coupled with dehydration. People tend to forget to drink on cool, wet days, and can get hypothermic even when the temperature stays well above freezing.

Symptoms of hypothermia include:

- Slurred speech.
- Weakness and loss of coordination.
- Confusion.
- Irrational behavior.
- Uncontrollable shivering (although, at extremely low body temperatures, shivering may stop).
- Pale and cold skin.
- Drowsiness – especially in more severe stages.
- Slowed breathing or heart rate.

Your body automatically begins to shiver to warm itself. As your energy is used up to keep warm, you may reach a point where your body will be unable to warm itself. If left untreated, your body will gradually shut down; and you can die.

You can avoid hypothermia with the following precautions:

- Stay hydrated.
- Avoid fatigue.
- Avoid cold winds.
- Change out of wet clothes.
- Be aware of the symptoms and act immediately upon their onset.

If you recognize hypothermia, take the following steps:

- Move the patient to shelter.
- Remove wet clothes and replace them with warm, dry garments.
- If the victim is alert, give them food and warm liquids to drink.
