**Predictive Services Discussion:** Upper-level troughing will weaken over the Pacific Northwest and Northern Rockies with weaker southwest flow aloft over California and the Great Basin. High pressure will remain over the southern Plains and extend into the Great Lakes. The remnants of Ida will move eastward across southern New England and move out into the Atlantic by evening. Dry and breezy conditions are likely for the central and northern Great Basin into western Wyoming but will be lighter than previous days with peak gusts of 20-30 mph. Dry, post-frontal northerly winds are also possible across northern Montana into North Dakota and western South Dakota. Relative humidity will remain low in much of the northern Intermountain West with the lowest values of 5-15% across northern California, eastern Oregon, and the western and northern Great Basin with poor overnight recovery. Monsoon moisture will begin to decrease across the Great Basin and Southwest with isolated to scattered mainly wet thunderstorms likely in the afternoon. As the cold front moves through the northern Plains, showers and thunderstorms are expected with the storms moving into western Minnesota with lower chances of wetting rain in northeast Minnesota.

## Aircraft and Pilot Carding

Aviation Category

Every aircraft and pilot used in support of a federal wildland fire mission must have a current Aircraft and Pilot Card or letter of authorization. The card must be held in the aircraft or with the pilot and give specific authorization to complete the requested mission. **These missions could be all or any number of missions as follows:**

- Air Attack (Level I, Level II, Level III)
- Reconnaissance
- Fire Surveillance
- Water Delivery (buckets)
- Helitorch
- Cargo
- Longline
- Plastic Sphere Dispenser (PSD) Operations

Every pilot who flies a properly-carded aircraft must possess a current Interagency Airplane or Helicopter Pilot Qualification Card that gives specific authorization to fly the type of mission requested and the specific type of aircraft being used for the mission. **These missions could be all or any number of missions as follows:**

- Air Attack
- Reconnaissance
- Fire Surveillance
- Low-level
- Paracargo
- Mountain/Remote Airstrips
- Smokejumper
- Longline

Before the aircraft and pilot can be used for a specific mission, the aircraft must be listed on a valid and current contract which includes the type of work being performed. A copy of the contract must be onboard the aircraft.

Each user of the aircraft and pilot has the authorization to physically inspect the Aircraft Data Card, the Interagency Airplane or Helicopter Pilot Qualification Card, and the contract. If any one of these three items is not available for inspection, the mission must be canceled or at least postponed until the authorization of the aircraft, pilot, or contract can be determined.

Pilots have very specific and closely monitored duty time and flight time limitations which users must understand and adhere to:

- 14-hour duty day,
- 8 hours flight time per day,
- 2 days off in 14 calendar days, and
- 36 hours cumulative flight time in any 6 consecutive days.
