**Predictive Services Discussion:** An upper-level trough will move through the northern Plains as weak high pressure builds into the Northwest. Upper ridging is forecast across the Southwest stretching to the Southeast with a deep trough over New England. A cold front will continue moving through the Plains but will stall over southern Wyoming and northern Colorado. Terrain driven winds are forecast for much of the west except breezy and dry conditions are likely across portions of southern Idaho, northern Utah, Wyoming, and northern Colorado. Very dry conditions are forecast for much of California, eastern Oregon, and the western and northern Great Basin with relative humidity of 5-20% in the afternoon and poor overnight recovery for mid-slopes and ridges. Isolated to scattered mixed wet and dry thunderstorms will continue across eastern Arizona, New Mexico, the Colorado Rockies, Wyoming, and southeast Montana. Scattered strong to severe thunderstorms are also likely from eastern Wyoming and eastern Colorado across the central Plains and into the southern High Plains.

## Instructions and Assignments Not Clear

*Fire Communications Category*

Every firefighter will give and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did you use the *Incident Response Pocket Guide (IRPG)*, PMS 461, standards briefing checklist?
- Did they ask questions? Do you get empty stares? What feedback are you looking for to ensure they understand you?
  - Talk with coworkers about what it is like giving a briefing.
- Did they take notes? What kind of information would you like to see people write down?
- Did they repeat information back? What other ways can you identify that your briefing is understood?
- Did you give all the necessary information? How will you ensure that you covered everything necessary?
  - Task
  - Location
  - Communications
  - Hazards
  - Who, when, etc.

It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:

- Did you really listen? What do you do to make yourself pay attention to everything being said?
- Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- You must know the location of the assignment and:
  - What is to be done.
  - Who you are to report to and how often to report.
  - Expectations for completing the assignment.
  - Hazards.
  - Communication plan frequencies.
  - Weather and fire behavior.
  - Status of adjoining forces.
