

National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 15, 2021 – 0730 MDT
National Preparedness Level 5

National Fire Activity:

Initial attack activity:	Light (80 fires)
New large incidents:	2
Large fires contained:	3
Uncontained large fires: ***	60
NIMOs committed:	2
Type 1 IMTs committed:	9
Type 2 IMTs committed:	15

Nationally, there are 32 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

Two hundred twenty-five soldiers from the 23rd Brigade Engineer Battalion and 2-3 Infantry Battalion based out of Joint Base Lewis-McChord are deployed in support of the Dixie Fire.

One MAFFS C-130 airtanker and support personnel each from the 152nd Airlift Wing (Nevada Air National Guard), three MAFFS from the 302nd Airlift Wing (Colorado Air Force Reserve), two MAFFS from the 153rd Airlift Wing (Wyoming Air National Guard) and two from the 146th Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) and one RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 162nd Operations Group (Arizona Air National Guard) have been deployed to Sacramento, CA in support of wildland fire operations. Also supporting these aircraft are eight ground controllers from multiple U.S. Air National Guard squadrons.

One Boeing 737 airtanker from New South Wales, Australia is supporting fire suppression efforts in the western United States.

Two fire suppression crews from Quebec, Canada are supporting fire suppression efforts in Washington State.

Northwest Area (PL 5)

New fires:	9
New large incidents:	0
Uncontained large fires:	20
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7

Cougar Peak, Fremont-Winema NF, USFS. IMT 2 (NW Team 8). Fifteen miles northwest of Lakeview, OR. Timber, brush and medium slash. Moderate fire behavior with creeping, torching and spotting. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Schneider Springs, Okanogan-Wenatchee NF, USFS. IMT 2 (NW Team 10). Eighteen miles northwest of Naches, WA. Short grass, timber and brush. Active fire behavior with flanking, short crown runs and isolated torching. Several communities and numerous structures threatened. Area, road and trail closures in effect.

Devil's Knob Complex (2 fires), Umpqua NF, USFS. IMT 1 (RM Team 1). Twenty miles northeast of Azalea, OR. Timber and medium slash. Active fire behavior with short crown runs, backing and flanking. Structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Middle Fork Complex (2 fires), Willamette NF, USFS. IMT 2 (NW Team 6). Nine miles northeast of Oakridge, OR. Timber and light slash. Moderate fire behavior with backing, creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

Rough Patch Complex (4 fires), Umpqua NF, USFS. IMT 1 (GB Team 2). IMT is also managing the Jack incident. Eighteen miles southwest of Oakridge, OR. Closed timber litter and timber. Active fire behavior with flanking, single tree torching and backing. Structures threatened. Area, road and trail closures in effect.

Jack, Umpqua NF, USFS. Thirty-one miles east of Roseburg, OR. Closed timber litter and timber. Minimal fire behavior with backing and creeping. Area, road and trail closures in effect.

Bull Complex, Mt. Hood NF, USFS. IMT 2 (NR Team 4). IMT 2 (NW Team 13) mobilizing. Twenty-five miles northeast of Mill City, OR. Timber and closed timber litter. Moderate fire behavior with backing, creeping and isolated torching. Area, road and trail closures in effect.

Twenty-five Mile, Okanogan-Wenatchee NF, USFS. Transfer of command from IMT 1 (PNW Team 3) to IMT 2 (SW Team 3) will occur today. Twelve miles northwest of Chelan, WA. Short grass, brush and timber.

Moderate fire behavior with creeping, torching and smoldering. Numerous structures and communication infrastructure threatened. Area, road and trail closures in effect.

Summit Trail, Colville Agency, BIA. Seventeen miles west of Inchelium, WA. Timber and closed timber litter. Minimal fire behavior with smoldering.

Big Meadow, Burns District, BLM. IMT 2 (NW Team 7). Twenty-eight miles west of Burns, OR. Timber and brush. Moderate fire behavior with isolated torching, short-range spotting and backing. Residences threatened. Area and road closures in effect.

Green Ridge, Umatilla NF, USFS. Thirty miles east of Walla Walla, WA. Short grass, timber and medium slash. Moderate fire behavior with short-range spotting, single tree torching and backing. Numerous structures threatened. Area, road and trail closures in effect.

Muckamuck, Colville NF, USFS. Four miles northwest of Conconully, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Residences threatened. Area, road and trail closures in effect.

Cedar Creek, Okanogan-Wenatchee NF, USFS. Fifteen miles northwest of Winthrop, WA. Brush, closed timber litter and timber. Moderate fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect.

Cub Creek 2, Southeast Region, DNR. Five miles north of Winthrop, WA. Brush, closed timber litter and timber. Moderate fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect.

Walker Creek, Northeast Region, DNR. Four miles northwest of Wauconda, WA. Timber and closed timber litter. Minimal fire behavior with backing, creeping and smoldering. Numerous residences and infrastructure threatened. Area, road and trail closures in effect.

WRF – White River NF, USFS

Southern Area (PL 1)

New fires:	25
New large incidents:	2
Uncontained large fires:	2

* **Scholar Creek**, Okmulgee Field Office, BIA. Eight miles east of Drumright, OK. Timber and tall grass. Active fire behavior with uphill runs, running and single tree torching. Structures threatened.

* **Glass Hollow Ranch**, Oklahoma DOF. Five miles southeast of Stilwell, OK. Hardwood litter. Moderate fire behavior.

Ten Year Average Fires (2011 – 2020 as of today)	44,777
Ten Year Average Acres (2011 – 2020 as of today)	6,340,170

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: Upper-level troughing will move into the Northwest and Northern Rockies and push a strong Pacific cold front through Montana and into the northern Great Basin and Wyoming. Upper-level ridging will remain over the Southwest with ridging weakening over the eastern US. The remnants of Hurricane Nicholas will move into Mississippi. Windy conditions are likely for the Northern Rockies into the northern Great Basin and Wyoming ahead of the Pacific cold front. Breezy and dry conditions are also likely for the remainder of the Great Basin and northeast California as well as near and east of the Cascade crest in Washington and Oregon. Temperatures will remain much above normal across southern California into the Southwest, Colorado Rockies, and southern Plains. Heavy rain with potential flooding will continue across portions of the Southeast associated with the remnants of Nicholas. Isolated mixed wet/dry thunderstorms are possible over New Mexico. Scattered showers and thunderstorms, some possibly severe, are likely along a cold front from the Ohio Valley into the Northeast.

Falling Snags

Felling Safety Category

Snags (dead, standing trees without leaves or needles in the crowns) and other hazard trees present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; they are subject to rot and they burn more readily. In the process, they often throw firebrands far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning. Live, green trees that have been weakened by insects, disease, weather, past fires, and age present equal hazard and can fall without warning.

- The risk of injuries from hazard trees increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags and weakened live trees may limit the widespread use of crews at night in areas of fire weakened or dead and dying timber.
- Environmental conditions that increase risk from hazard trees: Strong winds or erratic winds from storm cells. Night operations. Machine operations. Air operations - cargo drops, water or retardant drops, helicopter take off/landing, low-level flights. Steep slopes. Diseased or bug-killed areas.
- Things to consider when assessing the potential dangers of hazard trees: Trees have been burning for an extended period. High-risk tree species (those that are known for rot and shallow root systems) are in the area. Numerous downed trees. Dead or broken tips and limbs overhead. Accumulation of downed limbs. Tree decay, cavities, splits, and cracks. Absence of needles, bark, or limbs. Leaning or hung-up trees. Roots damaged by equipment or erosion.
- Mitigation measures to take: Identify and flag all high-risk areas until the hazard has been removed. Keep personnel out of the high-risk areas until the hazard has been removed. Use qualified saw teams and felling bosses. Establish lookouts. Plan a quick and safe escape route. Do not turn your back on a falling tree. Maintain situational awareness.
