

**National Interagency Coordination Center
Incident Management Situation Report
Monday, September 20, 2021 – 0730 MDT
National Preparedness Level 5**

National Fire Activity:

Initial attack activity:	Light (57 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires: ***	54
NIMOs committed:	1
Type 1 IMTs committed:	7
Type 2 IMTs committed:	16

Nationally, there are 34 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

Two hundred twenty-five soldiers from the 23rd Brigade Engineer Battalion and 2-3 Infantry Battalion based out of Joint Base Lewis-McChord are deployed in support of the Dixie Fire.

One MAFFS C-130 airtanker and support personnel each from the 152nd Airlift Wing (Nevada Air National Guard), three MAFFS from the 302nd Airlift Wing (Colorado Air Force Reserve), two MAFFS from the 153rd Airlift Wing (Wyoming Air National Guard) and two from the 146th Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) and one RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 162nd Operations Group (Arizona Air National Guard) have been deployed to Sacramento, CA in support of wildland fire operations. Also supporting these aircraft are eight ground controllers from multiple U.S. Air National Guard squadrons.

One Boeing 737 airtanker from New South Wales, Australia is supporting fire suppression efforts in the western United States.

Two fire suppression crews from Quebec, Canada are supporting fire suppression efforts in Washington State.

Northern California Area (PL 5)

New fires:	10
New large incidents:	0
Uncontained large fires:	7
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	4

Caldor, Eldorado NF, USFS. IMT 2 (CA Team 12). Sixteen miles northeast of Plymouth, CA. Timber, light slash and brush. Moderate fire behavior with creeping, smoldering and isolated torching. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Dixie, Butte Unit, Cal Fire. Unified command between NIMO (Team 1), IMT 1 (CA Team 1) and IMT 2 (CA Team 14). IMT 2 (SA Gold Team) mobilizing. Fifteen miles northeast of Paradise, CA. Timber, brush and light slash. Minimal fire behavior with creeping and smoldering. Several communities, numerous structures and infrastructure threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Monument, Shasta-Trinity NF, USFS. IMT 1 (NR Team 2). One mile southwest of Del Loma, CA. Timber and brush. Moderate fire behavior with flanking, backing and creeping. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

River Complex (2 fires), Klamath NF, USFS. IMT 1 (CA Team 2). Nine miles southwest of Etna, CA. Timber and brush. Moderate fire behavior with creeping and smoldering. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

McCash, Six Rivers NF, USFS. Transfer of command from IMT 2 (GB Team 7) to IMT 1 (AK Team 1) will occur today. Fourteen miles northeast of Somes Bar, CA. Timber, closed timber litter and brush. Minimal fire behavior with smoldering and creeping. Structures threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Antelope, Klamath NF, USFS. IMT 2 (CA Team 10). Twenty miles northeast of McCloud, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Cougar Peak, Fremont-Winema NF, USFS. IMT 2 (NW Team 8). IMT 2 (NW Team 12) mobilizing. Fifteen miles northwest of Lakeview, OR. Timber, brush and medium slash. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Schneider Springs, Okanogan-Wenatchee NF, USFS. IMT 2 (NW Team 10). Eighteen miles northwest of Naches, WA. Short grass, timber and brush. Minimal fire behavior with backing, creeping and smoldering. Several communities and numerous structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Devil's Knob Complex (2 fires), Umpqua NF, USFS. IMT 1 (PNW Team 2). Twenty miles northeast of Azalea, OR. Timber and medium slash. Minimal fire behavior with smoldering and creeping. Structures and infrastructure threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Rough Patch Complex (4 fires), Umpqua NF, USFS. IMT 1 (GB Team 2). IMT 2 (NW Team 7) mobilizing. IMT is also managing the Jack incident. Eighteen miles southwest of Oakridge, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Jack, Umpqua NF, USFS. Thirty-one miles east of Roseburg, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Middle Fork Complex (2 fires), Willamette NF, USFS. IMT 2 (NW Team 6). Nine miles northeast of Oakridge, OR. Timber and light slash. Minimal fire behavior with smoldering. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Bull Complex, Mt. Hood NF, USFS. IMT 2 (NW Team 13). Twenty-five miles northeast of Mill City, OR. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Twenty-five Mile, Okanogan-Wenatchee NF, USFS. IMT 2 (SW Team 3). Twelve miles northwest of Chelan, WA. Short grass, brush and timber. Minimal fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Big Meadow, Burns District, BLM. Twenty-eight miles west of Burns, OR. Timber and brush. Minimal fire behavior with smoldering. Structures threatened. Area and road closures in effect.

Cedar Creek, Okanogan-Wenatchee NF, USFS. Fifteen miles northwest of Winthrop, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Cub Creek 2, Southeast Region, DNR. Five miles north of Winthrop, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and short-range spotting. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Walker Creek, Northeast Region, DNR. Four miles northwest of Wauconda, WA. Timber and closed timber litter. Minimal fire behavior with backing, creeping and smoldering. Numerous residences and infrastructure threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Summit Trail, Colville Agency, BIA. Seventeen miles west of Inchelium, WA. Timber and closed timber litter. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday.

Ten Year Average Acres (2011 – 2020 as of today)	6,268,557

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: A strong upper-level trough will move from the Rockies to the Plains, with an associated cold front pushing south and east through the Southwest and much of the Plains. Upper-level ridging will remain over the East Coast, but break down over the Great Lakes, while re-emerging over the West in the wake of the upper-level trough. Thunderstorms and showers are forecast across much of the Midwest into the Great Lakes, with heavy rain possible, including in northern Minnesota. Lingering showers will remain near the Divide in Montana and Idaho and across Wyoming. Dry and breezy conditions are likely across portions of New Mexico and southern Colorado, and onto the southern and central High Plains near and ahead of the cold front and amid downslope flow. Gusty north-northeast winds are likely to continue in portions of the Coast Ranges and western Sierra slopes in northern and central California through tonight with minimum daytime relative humidity of 10-25% and overnight relative humidity of 20-50%. Recent precipitation will limit the threat in portions of northwest and far northern California, but lower rainfall amounts in the Coast Ranges near the Bay Area, Sacramento Valley, and portions of the Sierra combined with extreme to exceptional drought may not provide enough relief.

Avoiding Fuel Geysering

Miscellaneous Fireline Hazards

Fuel geysers continue to be reported and the potential for injury is real. In 2018, there were 28 incidents of fuel geyser reported: 23 chainsaws, a leaf blower, and four jerry cans. A fuel geyser can happen on any equipment with a fuel tank including fuel bottles and containers. Even chainsaws with two-way vents may "geyser" at high temperatures or high elevation. User should assume all gas-powered equipment and fuel containers are pressurized.

Fuel – Know Your Fuel

- Fuel volatility changes seasonally and geographically.
- Think locally. Using fuel from a cooler climate (i.e., Idaho) in a warmer climate (i.e., Texas) increases the geysering potential.
- As elevation increases, boiling point temperatures decreases. 125°F at 8,000 feet. is approximately equivalent to 140°F at 1,000 feet.

Fuel Bottles and Containers

Fuel bottles (i.e., Sigg bottles), fuel containers (i.e., dolmars or jerry cans) can geyser even after the cap is removed. To mitigate possible fuel geyser and/or potential injury from fuel bottles and cans, use the following procedures:

- Keep containers in the shade and away from any external heat source.
- **Never** open a fuel tank within 20 feet of any heat source.
- **Gently shake the container to release surface tension. Too much agitation will create pressure.**
- Open container slowly, pointing opening away and cover the opening with a cloth and glove.

Engine Powered Equipment

- **Never** use fuel that was stored in a fuel container for longer than one month. Older fuel may lead to poor engine performance and increased operating temperatures. Older fuel may also have higher volatility for the current conditions.
- **Always** check fuel level in the tank before taking any action. Fuel levels above $\frac{1}{2}$ tank are more likely to geyser.
- **Never** open a fuel tank within 20 feet of any heat source.
- **Only after the above mitigations are completed**; put the equipment in a cleared area, cover the cap with a cloth or glove, and open slowly.

For more information or if you experience a fuel geyser, see the
Fuel Geyser Awareness section at
