Predictive Services Discussion: An easterly wave will merge with a portion of a trough over the southern Great Basin to form a weak upper low over southeast California. A closed upper low will slowly move north-northeast over Michigan with a strong upper-level trough driving southeast into the northern Plains. Upper highs are forecast to be off the California and Northeast coasts. A Pacific cold front will stall and weaken across the Great Basin with another cold front likely pushing south through the northern Plains. Dry and breezy conditions are likely on portions of the Plains with south to southwest winds ahead of the front and north winds behind it. Locally gusty northeasterly winds are also forecast in northern and central California into southwest Oregon with low relative humidity and poor overnight recovery. Moisture is likely to move northward into Arizona, western New Mexico, and far southern California with isolated showers and thunderstorms and showers possible. Showers are also possible in the Colorado Rockies, Wyoming, and portions of eastern Utah.

After Action Review (AAR) – Part 2

Fire Communication Category

The Chainsaw AAR

The scenario: It's late. The crew has worked the fire for sixteen hours straight. No one has eaten a hot meal for days and, oh yeah, you might as well be cold.

No time for an AAR? Think again! There's plenty of time for a chainsaw AAR.

The idea behind the chainsaw AAR is simple: **speed**. When you need to get an AAR done quickly, try this simple format.

1. Have the team form a loose circle.
2. Start with a single team member and ask one of these questions:
 - **What is one thing that went well on this shift?**
 - **What is one thing that did not go well on this shift?**
 - **What is one thing you would do differently next time?**
 - **What is one thing you learned today?**
3. Continue around the circle until everyone has had a chance. It may be necessary to place a time limit on each individual (such as 30 seconds).
4. Avoid unnecessary discussion (dinner is waiting).
5. Note the comments for future discussion.
