**Predictive Services Discussion:** An upper-level trough will move into the Intermountain West with an upper low over Colorado rejoins the upper-level flow. Upper ridging will extend from the Deep South through the western Great Lakes with troughing aloft remaining over the Northeast and Mid-Atlantic. A Pacific cold front will slide south and east during the day into the northern Plains, central Rockies, and southern Great Basin. Elevated to critical conditions are expected over southeast Montana, northeast Wyoming, and the western Dakotas today. Breezy to windy conditions are forecast over much of the Intermountain West and central Plains but relative humidity will be significantly higher. A band of showers will move through southern Idaho into western Montana with light rainfall before diminishing. Scattered mainly wet thunderstorms are forecast across eastern Arizona, eastern Utah, and the Rockies while more numerous showers and thunderstorms are likely over much of Texas into southern Oklahoma. Showers will continue over much of the Northwest into tonight with wetting rain.

## Escape Routes – Part 2

Operational Engagement Category

Escape routes are the paths available to firefighters from their current location when exposed to danger to an area free from danger. There should always be more than one escape route available to firefighters.

Escape routes are probably the most elusive component of Lookouts, Communications, Escape Routes, and Safety Zones (LCES). Their effectiveness changes continuously. As firefighters work along the fire perimeter, fatigue and spatial separation can increase the time required to reach the safety zone.

The most common escape routes (or part of an escape route) include the fireline. On an indirect or parallel fireline, situations become more complex. Unless safety zones have been identified ahead, as well as behind, a firefighters' retreat may not be possible.

- Discuss how you would judge the effectiveness of an escape route. Have you ever timed yourself using an escape route?
- Describe an instance when you were uncomfortably distant from your escape routes.
- Describe a method you have used to communicate the location of an escape route to your crews.
