

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, April 11, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity (April 8 – April 10, 2022):**

Initial attack activity:	Light (217 Fires)
New large incidents:	16
Large fires contained:	9
Uncontained large fires: ***	16
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 0 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern Area (PL 3)**

New fires: 135  
 New large incidents: 12  
 Uncontained large fires: 11

**Beaver River**, Oklahoma DOF. Six miles southwest of Floris, OK. Tall grass and timber. Minimal fire behavior with single tree torching.

**23**, Oklahoma DOF. Six miles northeast of Forgan, OK. Tall grass and brush. Moderate fire behavior with spotting and single tree torching. Structures threatened.

\* **North Canadian**, Oklahoma DOF. Six miles northwest of Fort Supply, OK. Timber and tall grass. Minimal fire behavior with smoldering. Numerous structures threatened.

\* **Persimmon Gully**, Louisiana Office of Forestry. Six miles southwest of Dequincy, LA. Medium slash. Active fire behavior with spotting. Structures threatened.

\* **Tram Road**, Oklahoma DOF. Four miles north of Rattan, Ok. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering.

\* **Aggie Flat Road**, Oklahoma DOF. Four miles northeast of Peggs, OK. Hardwood litter. Minimal fire behavior with smoldering. Structures threatened

\* **Crystal Cave**, Oklahoma DOF. Fifteen miles southwest of Stilwell, OK. Hardwood litter. Moderate fire behavior with wind-driven runs. Structures threatened.

\* **Kid**, Texas A&M Forest Service. Started on private land one mile south of Skidmore, TX. Brush and tall grass. Extreme fire behavior.

\* **Tongue**, Oklahoma DOF. Twenty-one miles northeast of McAlester, OK. Heavy slash and short grass. Minimal fire behavior.

\* **Training Area 23**, Texas A&M Forest Service. Seventeen miles north of San Antonio, TX. Brush and tall grass. Moderate fire behavior. Residences threatened.

**Hurricane**, Daniel Boone NF, USFS. Five miles southwest of Oneida, KY. Timber. No new information. Last report unless new information is received.

\*\*\*Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

**Predictive Services Discussion:** Elevated to critical fire weather conditions will develop across much of the southern Great Basin, Southwest, and southern and central High Plains today. West-southwest sustained winds of 15-35 mph and minimum relative humidity of 10-20% are forecast over the southern Great Basin into the Southwest, with south-southwest sustained winds of 15-25 mph amid minimum relative humidity of 5-20% forecast on the southern and central High Plains. Lingering dry conditions will continue in portions of Florida stretching northeast into the Carolinas with minimum relative humidity below 30%. Scattered to widespread precipitation is expected across the northern half of the West, including heavy snow in the mountains. Well below normal temperatures across this area will lower snow levels to some valleys and basins. Snow will fall across portions of the northern Plains into the central Plains as well. Thunderstorms, some severe, are likely from north Texas into the Ozarks, Mid and Lower Mississippi Valleys, and Ohio Valley.

## Base All Actions On Current And Expected Fire Behavior

*Weather – Fire Behavior Category*

### Discussion Points:

- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working.
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- Can the resources you are replacing give you a thorough briefing? What information will you want to get from these resources?
- To reduce risk, initiate the following:
  - Post lookouts.
  - Check communications.
  - Retreat if you have doubts about your escape routes or safety zones, or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

How would you judge the fire season? (Above normal, below normal, or average.)
