

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, April 12, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (112 Fires)
New large incidents:	9
Large fires contained:	10
Uncontained large fires: ***	14
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 0 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires: 39
 New large incidents: 6
 Uncontained large fires: 8

23, Oklahoma DOF. Six miles northeast of Forgan, OK. Tall grass and brush. Moderate fire behavior with smoldering and spotting. Structures threatened.

North Canadian, Oklahoma DOF. Six miles northwest of Fort Supply, OK. Timber and tall grass. Minimal fire behavior with smoldering. Numerous structures threatened.

* **Leader Mountain**, Ouachita NF, USFS. Four miles north of Athens, AR. Hardwood litter and timber. Moderate fire behavior with backing and creeping.

Tram Road, Oklahoma DOF. Four miles north of Rattan, Ok. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering.

Crystal Cave, Oklahoma DOF. Fifteen miles southwest of Stilwell, OK. Hardwood litter. Minimal fire behavior. Structures threatened.

Training Area 23, Texas A&M Forest Service. Seventeen miles north of San Antonio, TX. Brush and tall grass. Moderate fire behavior.

* **Burke**, Texas A&M Forest Service. Started on private land 23 miles southwest of Palestine TX. Timber. Moderate fire behavior.

Persimmon Gully, Louisiana Office of Forestry. Six miles southwest of Dequincy, LA. Medium slash. No new information.

OSA – Osage Agency, BIA

Southwest Area (PL 2)

New fires: 14
 New large incidents: 2
 Uncontained large fires: 4
 Type 2 IMTs committed: 1

Hermits Peak, Santa Fe NF, USFS. IMT 2 (SW Team 4). Twelve miles northwest of Las Vegas, NM. Timber. Active fire behavior with wind-driven runs, flanking and spotting. Residences threatened. Evacuations, area, road and trail closures in effect.

Overflow, Roswell Field Office, BLM. Twelve miles southeast of Roswell, NM. Grass. Moderate fire behavior with creeping and smoldering.

* **Big Hole**, Bernalillo District, NM State Forestry. Nine miles south of Los Lunas, NM. Timber and brush. Active fire behavior with short crown runs, wind-driven runs and running. Numerous structures threatened. Evacuations and road closures in effect.

* **Middle March**, Coronado NF, USFS. Ten miles northeast of Tombstone, AZ. Chaparral and tall grass. Extreme fire behavior with wind-driven runs, torching and running. Structures threatened.

Ten Year Average Acres (2011 – 2020 as of today)	522,462

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: Widespread critical to extremely critical fire weather conditions are expected across the southern and central Plains behind a sharpening dryline today. Southwest sustained winds of 20-45 mph gusting 40-70 mph amid minimum relative humidity of 5-15% are forecast this afternoon. Upper-level clouds may mitigate some of the fire weather conditions across portions of western Nebraska and western Kansas into eastern Colorado, but strong winds amid relative humidity will develop. The Sangre De Cristo Mountains south through the Jicarilla, Sacramento, and Guadalupe Mountains will also experience elevated to critical fire weather conditions, including the Hermits Peak Fire. Dry and windy conditions are likely to continue across portions of the southern Great Basin and Southwest as well. Severe thunderstorms are likely from central Texas and the Lower Mississippi Valley northward into the Mid-Missouri and Mississippi Valleys. Snow will continue across northern portions of the West into the Colorado Rockies and Four Corners, with blizzard conditions likely across the northern Plains.

Uninformed on Strategy, Tactics, or Hazards

Operational Engagement

Firefighters who are uninformed on strategy, tactics, or hazards are in conflict with Watch Out Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics, or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics, or hazards?
 - Discuss ways you might establish communications.
 - For example: Contact someone who is already on the fire and ask them what tactics and strategies are working or not working, what hazards have they witnessed, etc.
- Can scouting safely identify potential hazards?
 - Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane).
 - Discuss what types of hazards you might come across and ways you would mitigate them.
 - For example: If you arrive at a fire after dark and are instructed to dig line downhill with the fire below, how could you make this a safe situation?
- Have strategies, tactics, or hazards changed since last informed?
 - Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.).
 - Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.).
- Can you get a briefing from your supervisor?
 - Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics.
 - For example, if one crew decides to do a burnout but doesn't let the crew at the other end of the line know what they are doing, what can happen?
- To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are better informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information.
 - Emphasize ways to inform firefighters about strategies, tactics, and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
 - Use the [Incident Response Pocket Guide \(IRPG\)](#), [PMS 461](#), (back inside cover) Briefing Checklist.
