

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, April 21, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

Initial attack activity:	Light (46 fires)
New large incidents:	5
Large fires contained:	4
Uncontained large fires: ***	11
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1
Complex IMTs committed:	0

Nationally, there is one fire being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

#### Southwest Area (PL 4)

New fires:	4
New large incidents:	3
Uncontained large fires:	9
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1

\* **Tunnel**, Coconino NF, USFS. IMT1 (PNW Team 3) mobilizing. Nine miles northeast of Flagstaff, AZ. Timber and chaparral. Extreme fire behavior with running, long-range spotting and wind-driven runs. Residences threatened. Area, road and trail closures in effect.

**Crooks**, Prescott NF, USFS. IMT 1 (CA Team 4). Eleven miles south of Prescott, AZ. Timber and chaparral. Extreme fire behavior with wind-driven runs, short-range spotting and running. Communication infrastructure and numerous structures threatened. Evacuations, area, road and trail closures in effect.

**Hermits Peak**, Santa Fe NF, USFS. IMT 1 (SW Team 1). IMT is also managing the Calf Canyon incident. Twelve miles northwest of Las Vegas, NM. Timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

\* **Calf Canyon**, Santa Fe NF, USFS. Eighteen miles northwest of Las Vegas, NM. Timber. Extreme fire behavior with wind-driven runs, group torching and long-range spotting. Residences threatened. Evacuations, area, road and trail closures in effect.

**Cooks Peak**, Las Vegas District, NM State Forestry. IMT 2 (SW Team 5) mobilizing. Five miles north of Ocate, NM. Timber, grass and brush. Extreme fire behavior with crowning, single tree torching and running. Residences threatened. Evacuations and road closures in effect.

**McBride**, Capitan District, NM State Forestry. IMT 1 (SW Team 2). IMT is also managing the Nogal Canyon incident. One mile southeast of Ruidoso, NM. Light slash and grass. No new information.

**Nogal Canyon**, Capitan District, NM State Forestry. Eight miles northwest of Ruidoso, NM. Timber. No new information.

\* **Camino**, Southeast District, Arizona DOF. Six miles east of Sunizona, AZ. Grass and brush. Extreme fire behavior with running and wind-driven runs. Numerous structures threatened. Evacuations and road closures in effect.

**Big Hole**, Bernalillo District, NM State Forestry. Nine miles south of Los Lunas, NM. Timber and brush. Minimal fire behavior with smoldering.

Ten Year Average Fires (2011 – 2020 as of today)	13,720
--	--------

Ten Year Average Acres (2011 – 2020 as of today)	640,489
--	---------

\*\*\*Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

**Predictive Services Discussion:** A strong Pacific storm will move into the Intermountain West today with elevated fire weather conditions for much of the southern Great Basin into the Southwest and southern Front Range. Critical fire weather conditions are likely across northeast New Mexico into the Texas and Oklahoma panhandles this afternoon where relative humidity will drop to near 10. Breezy and dry conditions will occur across the northern and central High Plains as well. High temperatures today will be 10 to 20 degrees above normal for the Southwest, central Rockies, and High Plains ahead of the storm. The storm will bring rain and locally heavy mountain snow across central and northern California through much of the Great Basin, Northwest, and Northern Rockies. Scattered showers and thunderstorms will develop across the Northeast into the central Appalachians then westward into the central Plains with severe thunderstorms likely across eastern Kansas into eastern Nebraska, southern Iowa, and northern Missouri.

## UNEXPLDED ORDNANCE SAFETY

*Miscellaneous Fireline Hazards*

Unexploded ordnance (UXO) is most likely to be encountered on military or former military sites. UXO poses risk of injury or death to anyone in the vicinity.

### Situation Awareness

- Early identification of potential UXO is the first and most important step in reducing risk posed by UXO.
- Many types of UXO may be encountered:
  - Small arms munitions
  - Guided missiles
  - Rockets
  - Projectiles
  - Mortars
  - Bombs
  - Grenades
  - Sub munitions
- UXO may be found fully intact or in fragments. All UXO presents a potential hazard and should be treated as such.
- Deteriorated UXO presents a particular hazard because it may contain chemical agents that could become exposed.

### Hazard Control

- If you see UXO, stop and do not move closer.
- Isolate and clearly mark the area.
- Deny entry to others.
- Never transmit radio frequencies near UXO.
- Never remove anything near UXO.
- Never touch, move, or disturb UXO.
- **Keep a minimum of 1,000 feet away** from areas on fire that contain suspected UXO.
- Report discovery of UXO to your immediate supervisor and/or dispatch.
- U.S. Army Operations Center for incidents involving explosives and ammunition:  
(703) 697-0218.
