

National Interagency Coordination Center
Incident Management Situation Report
Tuesday, April 26, 2022 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (112 fires)
New large incidents:	4
Large fires contained:	6
Uncontained large fires: ***	8
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1
**Complex IMTs committed:	1

**Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are two fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	2
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1

Hermits Peak, Santa Fe NF, USFS. IMT 1 (SW Team 1). Twelve miles northwest of Las Vegas, NM. Timber. Moderate fire behavior with uphill runs, flanking and backing. Numerous residences threatened. Evacuations, area, road and trail closures. Precipitation occurred over the fire area yesterday.

Crooks, Prescott NF, USFS. IMT 1 (CA Team 4). Eleven miles south of Prescott, AZ. Timber and chaparral. Extreme fire behavior with wind-driven runs, short-range spotting and backing. Communication infrastructure and numerous structures threatened. Evacuations, area, road and trail closures in effect.

Cerro Pelado, Santa Fe NF. IMT 1 (SA Red Team). Seven miles east of Jemez Springs, NM. Timber and brush. Moderate fire behavior with creeping, backing and flanking. Numerous residences threatened. Evacuations, area and road closures in effect.

Cooks Peak, Las Vegas District, New Mexico State Forestry. IMT 2 (SW Team 5). Five miles north of Ocate, NM. Timber, grass and brush. Moderate fire behavior with flanking, backing and smoldering. Residences threatened. Evacuations and road closures in effect. Precipitation occurred over the fire area yesterday.

Tunnel, Coconino NF, USFS. IMT1 (PNW Team 3). Nine miles northeast of Flagstaff, AZ. Timber and brush. Moderate fire behavior with creeping and isolated torching. Communication infrastructure and numerous structures threatened. Area, road and trail closures in effect.

Mitchell, Las Vegas District, New Mexico State Forestry. Seven miles east of Mosquero, NM. Grass. Moderate fire behavior with creeping and smoldering.

McBride, Capitan District, New Mexico State Forestry. One mile southeast of Ruidoso, NM. Light slash and grass. Minimal fire behavior.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: An upper low will remain off the Northwest coast with upper ridging sliding east into the Plains this afternoon. An upper trough will move into the Great Lakes with the associated cold front moving off the East Coast. Elevated conditions are likely across portions of the central High Plains as south to southwest winds 10-20 mph with gusts 25-35 mph develop amid minimum relative humidity of 10-20%. Locally elevated conditions are also possible across western Arizona into the southern Great Basin with winds of 10-15 mph and gusts to 25 mph likely coinciding with low afternoon relative humidity. Showers with mountain snow are likely to continue across the Northwest coast into eastern Oregon and much of Idaho. Showers with light to locally moderate rainfall and isolated thunderstorms are expected with the eastern front as it moves off the coast with heavier rain possible in thunderstorms across south Texas.

Working with Helicopter Drops

Aviation Category

Consider the following questions when you have a helicopter with a bucket working in your area:

- Is the helicopter a Type 1? For larger helicopters, increase the distance ground personnel must standby from the drop zone.
- How might you use helicopter drops to knock down or secure a fire area that poses a direct threat to escaping control lines or climbing ladder fuels?
- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are there trees and/or snags in the drop zone?
- Are ground crews clear of the area?
- How will the winds affect the mission?
- What is the turnaround time for the helicopter from drop zone to fill site?
- Are people on the ground aware of the effects of the helicopter's rotor wash?
- Are you providing feedback to the pilot about drop accuracy? Be honest and constructive.
- How can high altitudes and/or high temperatures affect helicopter performance capabilities? Be aware they may be significantly reduced.
