

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Sunday, August 7, 2022 – 0730 MDT**  
**National Preparedness Level 3**

**National Fire Activity:**

|                               |                  |
|-------------------------------|------------------|
| Initial attack activity:      | Light (78 fires) |
| New large incidents:          | 5                |
| Large fires contained:        | 4                |
| Uncontained large fires: **   | 36               |
| Area Command teams committed: | 0                |
| NIMOs committed:              | 1                |
| Type 1 IMTs committed:        | 3                |
| Type 2 IMTs committed:        | 9                |
| ***Complex IMTs committed:    | 2                |

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 61 fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

### Northern California Area (PL 3)

|                          |    |
|--------------------------|----|
| New fires:               | 18 |
| New large incidents:     | 0  |
| Uncontained large fires: | 8  |
| NIMOs committed:         | 1  |
| Type 1 IMTs committed:   | 1  |
| Type 2 IMTs committed:   | 2  |

**McKinney**, Klamath NF, USFS. IMT 1 (CA Team 2). Fifteen miles northwest of Yreka, CA. Timber, tall grass and brush. Active fire behavior with flanking, backing and creeping. Several communities, numerous residences and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

**Yeti**, Klamath NF, USFS. IMT 2 (CA Team 10). IMT is also managing the Alex fire. Eight miles northeast of Happy Camp, CA. Closed timber litter and timber. Active fire behavior with short crown runs, flanking and backing. Several communities, numerous structures and communication infrastructure threatened. Evacuations, area and road closures in effect.

**Alex**, Klamath NF, USFS. Twenty-two miles northwest of Yreka, CA. Closed timber litter and timber. Minimal fire behavior with creeping and smoldering.

**2022 SRF Lightning Complex** (5 fires), Six Rivers NF, USFS. NIMO (NIMO Team 1) and IMT 2 (CA Team 11) mobilizing. One mile northeast of Willow Creek, CA. Timber and slash. Active fire behavior with running, wind-driven runs and group torching. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** A dry airmass will remain over the Inland Northwest today and spread into much of Idaho, western Montana, and northern California with relative humidity of 7-20% in the afternoon with poor overnight recovery of 20-40% for mid-slopes and ridges. Portions of northern California will have breezy conditions as well due to south winds gusting to 30 mph. Isolated mixed wet and dry thunderstorms are forecast across far northeast California into south-central Oregon with new fire starts possible. Scattered monsoonal thunderstorms will develop across much of the Southwest into the Colorado Rockies, but Nevada and Utah will be drier.

South winds of 10-20 mph will continue today across Texas and Oklahoma, but relative humidity will be higher at 25-40% due to increased low-level moisture from the Gulf of Mexico. Showers and thunderstorms are expected portions of the northern and central Plains into Midwest and Great Lakes ahead of a cold front. Isolated thunderstorms will develop from the southern Appalachians to the central Gulf Coast as well, but hot and dry conditions will develop this afternoon across the Northeast. Cool and moist conditions will continue across Alaska with another storm moving into western Alaska.

## Terrain and Fuels Make Escape to Safety Zones Difficult

### Operational Engagement Category

When fighting wildland fires, it is often easy to get committed to areas that put you in Watch Out Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Retreat times should be based on the slowest member of the crew.
  - Does the crew's condition allow for fast travel?
  - Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked?
  - Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be a lookout.
- To reduce the risks, consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.
