

Incident Management Situation Report
Friday, December 16, 2022 – 0730 MDT
National Preparedness Level 1

National Fire Activity (December 9, 2022 – December 15, 2022):

Initial attack activity:	Light (86 fires)
New large incidents:	1
Large fires contained:	2
Uncontained large fires: **	0
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are zero fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Ten Year Average Acres (2012 – 2021 as of today)	7,166,229

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov>

Predictive Services Discussion: An active weather pattern is forecast through late next week from the Continental Divide to the East Coast. A storm will exit the East Coast today with lingering rain for southern New England and Florida, while snow continues across northern New England and the Great Lakes through the weekend. The heaviest snow will fall in lake effect bands downwind of the Great Lakes. Drier cold fronts are expected to sweep through the Plains to the East Coast early to mid-next week with much colder air, and an Arctic outbreak is possible for the northern and central Plains to the Great Lakes late next week. The strongest front, the leading edge of the Arctic air, will move through late next week, with widespread rain and snow near and east of the Mississippi River. Rain is more likely south of the Ohio River and the Mid-Atlantic while snow falls to the north, but the location of the rain-snow transition remains very uncertain.

Across the West, drier weather is forecast into this weekend with upper ridging off the West Coast. The ridge is forecast to weaken over the Pacific Northwest into the northern Rockies next week with periods of low-elevation rain and snow for the mountains and higher elevation valleys. Rain and mountain snow may extend as far south as northern California and the northern Great Basin, but uncertainty remains. There is much higher confidence in warmer than normal conditions and dry weather for southern California and the Southwest.

Happy and Healthy Holidays

Firefighter Health & First Aid Category

Taking Care of Our Own

The holidays are here! This time of year can bring good times and good cheer, but the holidays can also bring challenges to our physical and emotional wellbeing. Here are a few tips to maintain a physically and emotionally healthy lifestyle throughout the holiday season.

Here are a few simple ideas to help maneuver the holiday season:

- **Maintain routines that support your wellbeing.** Holiday travel, food, parties, and family gatherings can challenge habits and routines related to diet, exercise, sleep, and substance use that keep us healthy. While it may be easy to let go of healthy habits during the holidays, it can be difficult to get back on track. We can increase the likelihood of maintaining healthy habits by anticipating challenging situations and making plans to maintain healthy routines. For example, if you know you'll be challenged to maintain your exercise routine while traveling, do some research in advance about places to hike, run, or workout in the area. If maintaining good sleep is important to you, consider ways to optimize sleep conditions in advance.
- **Anticipate stress and emotional needs.** Just as it's important to plan for maintaining habits that support physical health, it is important to make plans to address stress and emotional needs in advance. If you know the holidays are emotionally challenging for you, make proactive plans to meet your needs. If you know you might be feeling lonely over the holidays, be proactive about consistently connecting with others. For example, make a plan to reach out to at least one person per day, plan events that you look forward to, or volunteer to serve others in your community. If gatherings with family and friends become stressful, set boundaries, and make plans for time to recharge.
- **Go easy on your wallet.** This time of the year can get expensive and stressful due to costs like gift-giving and travel. Establish a budget in advance and be creative! Offer to have friends over for dinner instead of going out to eat. Set spending limits for gifts and use mail and technology to stay in touch with remote family and friends.
- **Connect.** The holidays are a great time to connect with people we care about. Now is a great time to reach out to friends, family, and coworkers to check in, share a funny memory or share what you appreciate about them. Make a list of people you want to reach out to and make your way through the list. While the holidays are often celebrated as a time of good cheer, they can be a difficult time for many people for different reasons. Never underestimate the impact of a simple text, call, a photo, video, or holiday card.
- For additional tips and information about staying healthy during the holidays and winter months, check out the Mental Health Subcommittee's 2021-2022 Winter and Holiday Newsletter here: [MHSC Winter Holiday Newsletter 2020-2021 \(nwcg.gov\)](https://www.nwcg.gov/committees/mental-health-subcommittee/newsletter-2020-2021)

Discussion topics:

- What plans can you make to maintain healthy habits and routines throughout the holiday season?
- Who do you plan to make connections with this holiday season?
