Incident Management Situation Report
Wednesday, July 13, 2022 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (120 fires)
New large incidents:	4
Large fires contained:	3
Uncontained large fires: **	19
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	9
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 94 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Isolated to scattered thunderstorms are likely in eastern portions of the Interior into southeast Alaska, but showers are likely in portions of the western/central Interior into southern Alaska as a cold front pushes south and surface low moves into the Gulf of Alaska. Cooler temperatures and higher humidity will arrive, but gusty northerly and westerly winds may accompany the frontal passage, with gusty southerly winds ahead of it. Isolated to scattered thunderstorms are possible from south-central Oregon into Idaho and Montana, including nocturnal thunderstorms, with the best chances and coverage in southwest Montana. Monsoon thunderstorms will develop over the greater Four Corners region into the Trans Pecos and Wyoming. Dry and breezy conditions will develop along and east of the Sierra across much of Nevada into western Utah and in portions of inland Pacific Northwest. Hot and dry conditions will continue in Texas, northern Great Basin, and portions of the northern Rockies onto northern and central High Plains. A weak tropical disturbance will bring chances of heavy rain to the central Gulf Coast, with thunderstorms likely across much of the Southeast. Drier post-frontal conditions are likely from the Ohio Valley into the Northeast.

Operational Briefings

Fire Communications Category

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the inside back cover of the [*Incident Response Pocket Guide \(IRPG\), PMS 461*](#):

- Situation:
 - Fire name, location, map orientation, other incidents in the area
 - Terrain influences
 - Fuel type and conditions
 - Fire weather (previous, current, and expected)
 - Winds, relative humidity (RH), temperatures, etc.
 - Fire behavior (previous, current, and expected): Time of day, alignment of slope and wind, etc.
- Mission/Execution:
 - Command: Incident Commander (IC)/immediate supervisor
 - Leader's intent: overall objectives/strategy
 - Specific tactical assignments
 - Contingency plans
 - Medevac plan: personnel, equipment, transport options, contingency plans
- Communications:
 - Communication Plan: tactical, command, air-to-ground frequencies, cell phone numbers, etc.
- Service/Support:
 - Other resources: working adjacent and those available to order
 - Aviation operations
 - Logistics: transportation, supplies and equipment
- Risk Management:
 - Identify known hazards and risks
 - Identify control measures to mitigate hazards/reduce risk
 - Include LCES
 - Identify trigger points for reevaluating operations
