

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Tuesday, July 19, 2022 – 0730 MDT**  
**National Preparedness Level 3**

**National Fire Activity:**

Initial attack activity:	Light (149 fires)
New large incidents:	14
Large fires contained:	18
Uncontained large fires: **	24
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	8
***Complex IMTs committed:	0

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 97 fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

### Alaska Area (PL 3)

New fires:	0
New large incidents:	2
Uncontained large fires:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Clear**, Fairbanks Area, Alaska DOF. IMT 1 (NR Team 1). Ten miles northwest of Anderson, AK. Timber, hardwood litter and closed timber litter. Minimal fire behavior with creeping and smoldering. Numerous residences threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

**Minto Lakes**, Fairbanks Area, Alaska DOF. IMT 1 (CA Team 1). Twenty miles southeast of Minto, AK. Timber and light logging slash. Minimal fire behavior with creeping and smoldering. Precipitation occurred over the fire area yesterday.

**Bean Complex** (4 fires), Tanana Zone, BLM. IMT 2 (NR Team 4). Started on state land 100 miles west of Fairbanks, AK. Timber and short grass. Minimal fire behavior with creeping and smoldering. Structures threatened. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

**Dalton Highway Complex** (7 fires), Tanana Zone, BLM. IMT 2 (CA Team 14). Seventy-seven miles northwest of Beaver, AK. Timber and short grass. Minimal fire behavior with creeping, isolated torching and backing. Energy infrastructure threatened. Precipitation occurred over the fire area yesterday.

**Lime Complex** (14 fires), Southwest Area, Alaska DOF. IMT 2 (NW Team 9). Fifty miles east of Chuathbaluk, AK. Short grass, timber and brush. Minimal fire behavior with smoldering and creeping. Numerous structures threatened. Precipitation occurred over the fire area yesterday.

**Middle Tanana Complex** (8 fires), Delta Area, Alaska DOF. Thirty-two miles northeast of Delta Junction, AK. Timber and brush. Minimal fire behavior with smoldering. Residences threatened.

**Brown Grass**, Upper Yukon Zone, BLM. Previously reported incident. Started on Native Corporation land 46 miles northeast of Venetie, AK. Timber and short grass. Minimal fire behavior.

\* **Chalatna**, Tanana Zone, BLM. Started on FWS land 29 miles from Allakaket, AK. Timber and short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

\* **East Henshaw**, Tanana Zone, BLM. Started on state land 25 miles northeast of Allakaket, AK. Timber and short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

**Predictive Services Discussion:** Very hot, record setting temperatures are forecast on much of the central and southern Plains and Lower Mississippi Valley, with temperatures as high as 115°F and relative humidity of 10-20% ahead of a cold front. Temperatures will be cooler behind the front across the northern Plains, but northwest winds of 15-30 mph are likely, with elevated to critical conditions forecast over portions of Wyoming and Nebraska. Isolated mixed wet and dry thunderstorms are likely across portions of southwest Kansas, western Oklahoma, and the Texas panhandle, with new fire starts possible. Dry and breezy southwest winds will develop to the east of the Cascade Gaps, northern Sierra, and central Montana, with above normal temperatures continuing. Isolated to scattered mainly wet monsoonal thunderstorms are expected across much of the Southwest into Utah and the Colorado Rockies, with mixed wet and dry thunderstorms across much of Nevada. Scattered showers and thunderstorms will develop across the Southeast, while strong to severe thunderstorms are likely across the northern Great Lakes.

**Some common tree deficiencies which contribute to potential felling hazards:**

**Weak Limbs:** limbs of all sizes and species with decay evident cracking, loose, hung-up, or fire damaged limbs. Avoid working under overhead hazards.

**Weak Tops:** split/schoolmarm tops that could have weakened unions, fire weakened tops, rotten or dead tops.

**Witches Broom:** caused by mistletoe infection, limbs can grow very large and heavy (200+ lbs). Can contribute to uneven weight distribution.

**Split Trunk:** cracked trunk from frost, lightning, or wind. Visible evidence of advanced decay indicates serious weakness where the tree could fail. May increase wood fiber tension contributing to barber chair potential.

**Stem Damage:** caused by windfall, scarring, fire, machine, and animal damage, as well as heart rot diseases.

**Cat Face:** look for enough solid wood to construct an effective undercut and back cut. Complexity increases when desired felling direction is different than that of the cat face.

**Thick Sloughing Bark:** usually found on dead trees. Loose bark, particularly on Douglas firs, can injure sawyers.

**Butt and Stem Cankers:** usually found on deciduous trees but can occur on Douglas fir and pine. The infected areas weaken the stem.

**Fungal Fruiting Bodies or Conks:** found on stems may indicate massive interior rot. Excessive resinosis (resin flow) also indicates heart or root diseases.

**Heavy Tree Lean:** look for any ground cracks around the base of the tree. May be caused by damaged roots or lifting root mats, shallow or wet soils. In some cases, the tree may have corrected itself which can be determined by looking for corrected top growth.

**Root Condition:** weakened roots may reduce felling control. Signs of decay or fungal conks on the roots, or fire weakened roots.

**Species Consideration:** consult local experts for species deficiencies particular to local areas. A good habit is to observe overall tree stand health wherever you're working.

Felling a hazard tree requires accurate risk assessment and complexity analysis and demands the sawyer's full situational awareness. Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Discuss indicators of tree defects specific to your local area.
