

National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 31, 2022 – 0730 MDT
National Preparedness Level 3

National Fire Activity:

Initial attack activity:	Light (85 fires)
New large incidents:	5
Large fires contained:	2
Uncontained large fires: **	17
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	6
***Complex IMTs committed:	1

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 57 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Very hot, including record setting, temperatures are expected again across the Pacific Northwest and into portions of the northern Great Basin, northern Rockies, and northern California. Isolated to scattered mixed wet and dry thunderstorms are likely across northern California, western and northern Oregon, and possibly into northeast Oregon and central Idaho. Near drier thunderstorms, pyrocumulonimbus development is possible on active large wildfires. Isolated thunderstorms are possible in central California, including along the coast. Scattered to numerous monsoonal thunderstorms are expected across the greater Four Corners region, southern California, and much of Nevada, although drier thunderstorms are likely in portions of northern Nevada. Coverage of hot, dry, and unstable conditions will increase across Texas and portions of Oklahoma. Thunderstorms are expected from eastern Oklahoma through the southern Appalachians, with less coverage just inland from the Gulf Coast and in Florida. Stronger to severe thunderstorms are likely in portions of Minnesota and the western Great Lakes. Isolated thunderstorms are possible in the Alaskan Interior.

What the SAFECOM system is:

The Aviation Safety CommuniquØ(SAFECOM) [AMD-34/FS-5700-14](#) should be used to report any condition, observation, act, maintenance problem, or circumstance with personnel or the aircraft that has the potential to cause an aviation-related mishap. SAFECOMS are a tool used to identify, document, track, and correct safety-related issues.

What the SAFECOM system is not:

- NOT intended for initiating punitive actions.
- NOT to be used as a complaint system or for personal attacks.
- NOT used by contracting officers for contract evaluations/award purposes.
- NOT a substitute for on-the-spot corrections to a safety concern.
- Does NOT replace the requirement for initiating an accident or incident report.

SAFECOMS provide the necessary feedback for development of the following communication tools and documents:

- Accident Prevention Bulletins
- Lessons Learned
- Safety Alerts
- Technical Bulletins
- Airwards
- Information Sharing Memos
- Maintenance Deficiencies (Airworthiness Directives (AD), Service Bulletins (SB), etc.)
- Safety Trends
- Training Needs

References:

Safecom Website, <https://www.safecom.gov>

See a short slide show on the Effective Use of the SAFECOM system on the website.
