

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 7, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (87 fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires: **	6
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 2 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	7
New large incidents:	0
Uncontained large fires:	5
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

Hermits Peak, Santa Fe NF, USFS. NIMO (Team 2), IMT 1 (PNW Team 2), IMT 1 (SW Team 2) and IMT 1 (SW Team 1). Twelve miles northwest of Las Vegas, NM. Hardwood litter, timber and light slash. Moderate fire behavior with backing, torching and spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Black, Gila NF, USFS. IMT 2 (SW Team 3). Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with wind-driven runs, uphill runs and flanking. Structures threatened. Evacuations, area, road and trail closures in effect.

Foster, Coronado NF, USFS. Thirty miles southwest of Animas, NM. Grass, brush and timber. Minimal fire behavior.

Cerro Pelado, Santa Fe NF, USFS. Seven miles east of Jemez Springs, NM. Grass, closed timber litter and medium slash. Minimal fire behavior. Area, road and trail closures in effect.

Bear Trap, Cibola NF, USFS. Twenty-two miles southwest of Magdalena, NM. Timber. Minimal fire behavior with smoldering and creeping. Structures threatened. Area, road and trail closures in effect.

Predictive Services Discussion: Breezy and dry conditions will develop across the southern Great Basin, West Slope, and Southwest west of the Divide. Temperatures will be warmer and relative humidity lower than yesterday, with areas of elevated conditions possible, most likely across southern Utah, northern Arizona, and the West Slope. A backdoor cold front will move south across the High Plains during the day, then west to the Divide across Colorado and New Mexico tonight. Scattered wet thunderstorms, some severe, are likely along the front across the High Plains during the afternoon and evening with the front, with increased low-level moisture and higher relative humidity recovery across Colorado and New Mexico east of the Divide. Hot temperatures with south winds near 15 mph will continue across portions of central and west Texas ahead of the front as well, with locally elevated conditions. Hot and dry conditions will prevail across much of Alaska, except for isolated to scattered showers and thunderstorms from the Panhandle into south-central Alaska. A cold front will move into the Northeast and Mid-Atlantic, with showers and thunderstorms and widespread wetting rain.

Proper Use of Trigger Points

Weather – Fire Behavior Category

Accurate situation awareness (SA) requires a constant reassessment of conditions (existing and potential) that may impact the safety and effectiveness of tactics. Monitor for the 18 Watch Out Situations and establish trigger points (in the form of operational or environmental limits) ahead of time.

Remember, trigger points are not decision-makers but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and its associated risks. They help you to determine and implement the proper course of action.

The following items are considerations in your planning and discussion.

- Use trigger points for preplanning. Do not wait until you are in the wrong place at the wrong time – with no time.
- Trigger points should be based on measurable factors such as:
 - Relative Humidity (RH).
 - Winds.
 - Fire behavior.
 - Topographical boundaries.
 - Time constraints/time of day.
 - Time/distance to safety zones.
 - Loss of suppression resources.
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change).
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required:
 - Identify hazards.
 - Assess hazards.
 - Develop controls and make risk decisions.
 - Implement controls.
 - Supervise and evaluate.
- Consider the following command/leadership responsibilities when changing tactics:
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command.
 - Account for all your people.
 - Make sure everyone knows and follows the new plan.
