

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 8, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (79 fires)
New large incidents:	9
Large fires contained:	1
Uncontained large fires: **	7
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 9 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	5
New large incidents:	0
Uncontained large fires:	5
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

Hermits Peak, Santa Fe NF, USFS. NIMO (Team 2), IMT 1 (PNW Team 2), IMT 1 (SW Team 2) and IMT 1 (SW Team 1). Twelve miles northwest of Las Vegas, NM. Hardwood litter, timber and light slash. Active fire behavior with backing, torching and spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Black, Gila NF, USFS. IMT 2 (SW Team 3). Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with wind-driven runs, uphill runs and flanking. Structures threatened. Evacuations, area, road and trail closures in effect.

Foster, Coronado NF, USFS. Thirty miles southwest of Animas, NM. Grass, brush and timber. Minimal fire behavior.

Cerro Pelado, Santa Fe NF, USFS. Seven miles east of Jemez Springs, NM. Grass, closed timber litter and medium slash. Minimal fire behavior. Area, road and trail closures in effect.

Bear Trap, Cibola NF, USFS. Twenty-two miles southwest of Magdalena, NM. Timber. Minimal fire behavior with smoldering and creeping. Structures threatened. Area, road and trail closures in effect.

Alaska Area (PL 2)

New fires:	14
New large incidents:	9
Uncontained large fires:	1

* **Kichatna**, Mat Su Area, Alaska DOF. Nineteen miles northwest of Skwentna, AK. Timber and grass. Moderate fire behavior with single tree torching and creeping. Structures threatened.

* **Hog Butte**, Tanana Zone, BLM. Started on BLM land 21 miles northwest of Telida, AK. Timber and short grass. Active fire behavior with isolated torching, backing and group torching. Last narrative report unless significant activity occurs.

* **Kokwok**, Southwest Area, Alaska DOF. Fifty miles north of Dillingham, AK. Timber. Moderate fire behavior with running, torching and backing. Last narrative report unless significant activity occurs.

* **Aghaluk Mountain**, Southwest Area, Alaska DOF. Forty-nine miles east of Aniak, AK. Short grass. Active fire behavior with running, spotting and backing. Last narrative report unless significant activity occurs.

* **Telaquana River**, Southwest Area, Alaska DOF. Forty miles southeast of Lime Village, AK. Timber. Active fire behavior with crowning, running and flanking. Structures threatened. Last narrative report unless significant activity occurs.

* **South Lime Lake**, Southwest Area, Alaska DOF. Seventeen miles northeast of Lime Village, AK. Timber and brush. Moderate fire behavior with creeping and smoldering. Last narrative report unless significant activity occurs.

* **Tatlawiksuk**, Southwest Area, Alaska DOF. Forty-one miles south of McGrath, AK. Timber. Active fire behavior with torching, creeping and spotting. Last narrative report unless significant activity occurs.

* **Adak**, Southwest Area, Alaska DOF. Started on FWS land nine miles north of Adak, AK. Short grass. Minimal fire behavior with smoldering. Last narrative report unless significant activity occurs.

* **Contact Creek**, Southwest Area, Alaska DOF. Started on NPS land 25 miles southeast of King Salmon, AK. Brush. Moderate fire behavior with smoldering, creeping and backing. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Locally elevated conditions are expected across portions of the southern Great Basin into central Arizona due to southwest winds of 10-20 mph amid relative humidity of 5-15%. To the east, limited moisture near the Continental Divide in New Mexico and southern Colorado will result in isolated mainly dry afternoon thunderstorms with the potential for several new fires. From the Front Range to the into the southern High Plains, thunderstorms are expected to be more numerous and wetter, with severe outflow winds and large hail possible. Hot, dry, and breezy conditions will develop across portions of central and southwest Texas as well. Showers and thunderstorms are forecast across the Appalachians to the Mid-Atlantic and Northeast with wetting rain, while scattered wet thunderstorms are likely across the southern Florida Peninsula. Very warm, dry, and breezy conditions will continue in southwest Alaska and the western Interior, with improving conditions likely for much of south-central Alaska.

Hazard Tree - Risk Management

Felling Safety Category

Consider the **severity**, **probability**, and **exposure** of **hazard tree** problems continually as you perform duties in forested communities. Remember to look for hazard tree risks at staging areas, parking areas, and camping areas.

● Environmental Element:

- Existing winds and forecast.
- Night operations or low visibility situations limiting your view of surroundings.
- Steep slopes.
- Diseased or bug-kill areas with high densities of dead or dying trees.
- Number, density, and height of hazard trees.
- Amount of time the area has been burning – burn down time.
- Potential for domino effect to surrounding trees.

● Hazard Tree Indicators:

- Trees burning for any period of time.
- High-risk tree species (rot and shallow roots).
- Numerous downed trees in the area.
- Dead, broken, or burning tops and limbs overhead.
- Accumulation of downed limbs.
- Fungus or growth of decay species on the tree.
- Cavities or evidence of woodpecker damage.
- Forked tops, multiple tops, and/or uneven branch distribution.
- Absence of needles, bark, or limbs.
- Leaning or hung-up.

● Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment.
- Avoid hazards by designating “No Work Zones” (NWZ) – (flag, sign, and map).
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area.
- Post lookouts to help maintain a secure area.
- Fireproof potential hazard trees to prevent ignition.
- Initiate road/traffic control and area closure.
- Keep clear of bucket drops near trees/snags.
- Establish trigger points for reposition to secure areas in response to high winds.
- Minimize exposure time in hazard tree areas using efficient felling techniques and limiting numbers of personnel in hazardous areas.
