

National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 12, 2022 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (89 fires)
New large incidents:	4
Large fires contained:	1
Uncontained large fires: **	11
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	6
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 25 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	18
New large incidents:	0
Uncontained large fires:	8
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Midnight, Carson NF, USFS. IMT 2 (EA Gold Team) mobilizing. Eight miles northwest of El Rito, NM. Timber. Extreme fire behavior with wind-driven runs, running and group torching. Numerous residences threatened.

Black, Gila NF, USFS. IMT 2 (SW Team 3). IMT 2 (SW Team 4) mobilizing. Twenty-four miles north of Mimbres, NM. Timber and grass. Active fire behavior with uphill runs, backing and short-range spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

Hermits Peak, Santa Fe NF, USFS. NIMO (Team 2), IMT 1 (SW Team 2) and IMT 1 (SW Team 1). IMT 2(SW Team 5) mobilizing. Twelve miles northwest of Las Vegas, NM. Hardwood litter, timber and light slash. Active fire behavior with flanking, torching and short-range spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Cerro Bandera, Bernalillo District, NM State Forestry. Eighteen miles southeast of Grants, NM. Timber, grass and brush. Minimal fire behavior with creeping and smoldering. Structures threatened. Road closures in effect.

Deer Creek, Coronado NF, USFS. Twenty-five miles southwest of Animas, NM. Grass and brush. Minimal fire behavior with creeping.

Cerro Pelado, Santa Fe NF, USFS. Seven miles east of Jemez Springs, NM. Grass, closed timber litter and medium slash. Minimal fire behavior. Area, road and trail closures in effect.

Adam, Gila NF, USFS. Twenty miles southeast of Reserve, NM. Timber and brush. Minimal fire behavior with smoldering and creeping. Structures threatened.

Mixen, Las Cruces Field Office, BLM. Eleven miles south of Alamogordo, NM. Short grass. Minimal fire behavior with smoldering.

Alaska Area (PL 3)

New fires:	4
New large incidents:	3
Uncontained large fires:	0
Type 2 IMTs committed:	1

East Fork, Galena Zone, BLM. IMT 2 (AK Green Team). Started on FWS land 25 miles northeast of St. Mary's, AK. Grass, brush and timber. Extreme fire behavior with wind-driven runs and isolated torching. Numerous structures threatened. Several communities threatened.

* **Tuklung River**, Southwest Area, Alaska DOF. Started on FWS land 33 miles southwest of Dillingham, AK. Brush. Active fire behavior with creeping. Last narrative report unless significant activity occurs.

* **Stony River**, Southwest Area, Alaska DOF. Started on BLM land 17 miles northwest of Lime Village, AK. Timber. Active fire behavior. Residences threatened. Last narrative report unless significant activity occurs.

* **Gagaryah River**, Southwest Area, Alaska DOF. Started on BLM land 16 miles northwest of Lime Village, AK. Timber. Active fire behavior with smoldering and creeping. Structures threatened. Last narrative report unless significant activity occurs.

Kokwok, Southwest Area, Alaska DOF. Forty-three miles north of Dillingham, AK. Timber. Active fire behavior with creeping, backing and running. Last narrative report unless significant activity occurs.

Aghaluk Mountain, Southwest Area, Alaska DOF. Forty-nine miles east of Aniak, AK. Grass and timber. Active fire behavior with running, short crown runs and group torching. Structures threatened. Last narrative report unless significant activity occurs.

Swift River, Southwest Area, Alaska DOF. Previously reported incident. Started on BLM land 13 miles northwest of Lime Village, AK. Timber. Active fire behavior with torching and spotting. Communication infrastructure and structures threatened. Last narrative report unless significant activity occurs.

Kiknik, Southwest Area, Alaska DOF. Sixty-six miles southwest of Lime Village, AK. Timber and brush. Active fire behavior with creeping, backing and single tree torching. Last narrative report unless significant activity occurs.

Submarine Creek, Southwest Area, Alaska DOF. Forty-five miles west of Telida, AK. Timber, grass and hardwood litter. Active fire behavior with creeping, group torching and short crown runs. Structures threatened. Last narrative report unless significant activity occurs.

Pike Creek, Southwest Area, Alaska DOF. Previously reported incident. Thirty-eight miles north of Igiugig, AK. Timber and brush. Active fire behavior with backing, torching and running. Residences threatened. Last narrative report unless significant activity occurs.

Koktuli River, Southwest Area, Alaska DOF. Previously reported incident. Thirty-six miles north of Igiugig, AK. Hardwood litter. Active fire behavior with smoldering and creeping. Last narrative report unless significant activity occurs.

Predictive Services Discussion: An upper-level trough will move into the Pacific Northwest, northern California, northwest Great Basin, and west of the Divide in the northern Rockies. Ahead of the trough and cold front, dry and windy conditions will spread across the southern Great Basin, West Slope, and northern Arizona. Remaining moisture over southeast Arizona, western and northern New Mexico, and the southern Colorado Rockies will result in isolated to scattered mixed wet and dry thunderstorms. Dry and windy conditions will likely coincide with areas of dry thunderstorms and hot, dry, and unstable conditions across southeast Arizona, New Mexico, and southern Colorado. Pyrocumulonimbus development is possible on very active large fires in the vicinity. Dry and windy conditions are also likely to spread onto portions of the southern and central High Plains.

An upper-level trough moving into Alaska will cool temperatures and bring isolated to scattered showers and wet thunderstorms to portions of the Interior, south-central Alaska, and the Panhandle. Scattered to widespread showers and thunderstorms are expected from the northern Sierra through the Pacific Northwest and across the northern Great Basin, and northern Rockies. Some of the thunderstorms could be severe from eastern Oregon through southern Montana and northern Wyoming onto the northern and central Plains. Strong to severe thunderstorms are forecast through the Midwest and to the Atlantic near a surface front, with chances of thunderstorms from the central Gulf Coast through the East Coast.

Initial Attack Sizeup/Safety

Operational Engagement Category

Having a good sizeup is important to give both the Incident Commander (IC) and Fire Management Officer (FMO) a good idea of existing problems and what resources may be needed for effective firefighting.

Use the following reporting factors for sizeup and reference local fire sizeup cards. Discuss others that may be used.

- Fire name and location.
- Terrain (slope, aspect, elevation) and position of fire on the slope.
- Size of fire.
- Fuel type, anticipated control problems, and spread potential.
- Values threatened.
- Weather conditions (wind speed and direction).
- Fire behavior.
- Resources on the fire and those needed.
- Estimated containment and control times.
- Cause (known, suspected, under investigation).

After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.

- Have you sized up the fire and relayed the information to dispatch?
- Is the observed fire weather consistent with the forecast?
- Can you control the fire with the resources available (on the incident or en route) and under the expected conditions?
- Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas)? Have you communicated this information to all personnel assigned to the incident, including new arrivals?
- Are lookouts in place or can you see the whole fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the 10 Standard Firefighting Orders being followed and/or mitigated?
- Do you have a complete list of what resources have been ordered for the fire?
- Will you control the fire before the next operational period? If you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency FMO or Duty Officer (DO)?
