

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, June 25, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

| | |
|-------------------------------|-------------------|
| Initial attack activity: | Light (176 fires) |
| New large incidents: | 7 |
| Large fires contained: | 3 |
| Uncontained large fires: ** | 22 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 7 |
| ***Complex IMTs committed: | 0 |

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 46 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 5 |

Contreras, Papago Agency, BIA. Transfer of command from IMT 2 (EA Gold Team) back to the local unit will occur today. Fifteen miles northeast of Topawa, AZ. Brush and short grass. Minimal fire behavior with creeping and smoldering. Numerous structures, energy and communication infrastructure threatened. Evacuations, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Pipeline, Coconino NF, USFS. Transfer of command from IMT 1 (GB Team 2) back to the local unit will occur on 6/27. IMT is also managing the Haywire fire. Five miles north of Flagstaff, AZ. Timber, brush and grass. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Haywire, Coconino NF, USFS. Seventeen miles northeast of Flagstaff, AZ. Timber, brush and short grass. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Hermits Peak, Santa Fe NF, USFS. NIMO (Team 2) and IMT 2 (SW Team 5) and IMT 2 (SW Team 3). IMT 2 (GB Team 7) mobilizing. Twelve miles northwest of Las Vegas, NM. Hardwood litter, timber and light slash. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Black, Gila NF, USFS. IMT 2 (SW Team 4). Twenty-four miles north of Mimbres, NM. Grass and timber. Minimal fire behavior with backing, creeping and smoldering. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Raspberry, Coronado NF, USFS. Eleven miles northeast of Portal, AZ. Timber, brush and short grass. Minimal fire behavior. Structures and communication infrastructure threatened.

Hog Spring, Apache-Sitgreaves NF, USFS. Ten miles east of Show Low, AZ. Timber and short grass. Minimal fire behavior with creeping and smoldering.

Fish, Apache-Sitgreaves NF, USFS. Twenty miles southwest of Alpine, AZ. Timber and medium slash. No new information.

Midnight, Carson NF, USFS. Eight miles northwest of El Rito, NM. Timber. No new information. Last report unless new information is received.

Predictive Services Discussion: Above normal temperatures of 100-107°F will continue across much of Texas into Oklahoma, with elevated conditions possible across portions southwest Texas due to south winds of 10-20 mph amid relative humidity of 12-20%. Hot and dry conditions will continue across California as well. Isolated mixed wet and dry thunderstorms will develop across the eastern Sierra through central Nevada into the mountains of Utah. More numerous wet monsoonal thunderstorms are likely across eastern Arizona, New Mexico, and Colorado. The monsoon moisture is likely to interact with a backdoor cold front across southeast Colorado into northeast New Mexico with heavy rain, flooding, and debris flows possible from recent burn scars. Scattered showers and thunderstorms will also develop along the cold front through the central Plains into the western Great Lakes, with scattered afternoon wet thunderstorms across the southern Appalachians into the Southeast. Above normal temperatures and dry conditions are forecast for much of Alaska, with elevated conditions likely due to gusty south winds over portions of western Alaska and near gaps in the Alaska Range.

Power Line Safety

Miscellaneous Fireline Hazards

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential injury or equipment damage:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Don't drive with long antennas under power lines.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Keep all aviation activity away from power lines. Inform air attack and/or other aviation resources of the location of the power lines.
- Don't stand near power lines during retardant drops.
- Don't apply a straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near: jump clear, don't hang on, keep feet together, and bunny hop away.
