

**National Interagency Coordination Center
Incident Management Situation Report
Friday, March 4, 2022 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (February 25 – March 3, 2022):

Initial attack activity:	Light (714 Fires)
New large incidents:	27
Large fires contained:	19
Uncontained large fires: ***	14
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires: 583
 New large incidents: 24
 Uncontained large fires: 12

* **497th**, Oklahoma DOF. Two miles south of Jennings, OK. Timber, dormant brush and hardwood slash. Extreme fire behavior with running, single tree torching and spotting. Structures threatened.

* **FISH CREEK**, Okmulgee Field Office, BIA. Two miles northeast of Dustin, OK. Timber and tall grass. Active fire behavior with running. Structures threatened.

* **Dustin Farms**, Okmulgee Field Office, BIA. Two miles south of Dustin, OK. Timber and tall grass. Active fire behavior with running. Structures threatened.

* **Valley X Ranch**, Oklahoma DOF. Four miles southwest of Daisy, OK. Timber and tall grass. Moderate fire behavior with creeping.

* **Hightop**, Oklahoma DOF. Seven miles northeast of Tahlequah, OK. Timber. Moderate fire behavior with uphill runs.

* **Hoppy Hill**, Okmulgee Field Office, BIA. One mile northwest of Hanna, OK. Timber and tall grass. Active fire behavior with running. Structures threatened.

* **3047 Milo Road**, Kentucky DOF. Five miles southeast of Ulysses, KY. Timber. Active fire behavior with running. Structures threatened.

Sulphur Flats, Oklahoma DOF. Five miles southwest of Jay, OK. Timber. Moderate fire behavior with wind-driven runs.

* **Corral**, Oklahoma DOF. Four miles southeast of Buffalo Valley, OK. Timber and hardwood and litter. Minimal fire behavior with smoldering.

* **Indian Trail South**, Oklahoma DOF. Three miles southeast of Pittsburg, OK. Hardwood litter. Minimal fire behavior with smoldering.

* **Windmill Gate**, Texas A & M Forest Service. Started on private land nine miles south of Archer City, TX. Brush and tall grass. Minimal fire behavior with creeping and smoldering.

* **Dalmatian**, Texas A & M Forest Service, Started on private land 23 miles north of Amarillo, TX. Tall Grass. Extreme fire behavior with running and wind driven runs.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://qacc.nifc.gov/>

Predictive Services Discussion: Widespread elevated and critical fire weather conditions are expected today and tomorrow across portions of the southern and central Plains and from southeast Arizona through southern New Mexico. Low relative humidity will also continue today and into tomorrow in portions of the Southeast, especially from the Lower Mississippi Valley to southern Georgia and down much of the Florida Peninsula. Dry and windy conditions are forecast to continue Sunday from southeast Arizona through southwest Texas, with lingering dry and breezy conditions into Monday across these areas. Gusty northerly winds in southeast California, southern Nevada, and southwest Arizona are likely early next week, with gusty offshore winds across southern California early to mid-next week. Another round of elevated to critical conditions are forecast from the Southwest onto the southern High Plains mid to late next week.

Widespread precipitation is expected from the Sierra through the Great Basin to the Rockies this weekend into Monday, including potentially heavy mountain snow. The northern half of the Southwest will receive precipitation as well, especially at higher elevations. More snow is forecast mid to late next week for the Cascades, northern Rockies, Colorado Rockies, and onto the northern High Plains. Thunderstorms, including severe, are likely across portions of the Midwest tomorrow and from the southern Plains into the Southeast and Ohio Valley Sunday and Monday, with snow stretching from the northern Plains into the western Great Lakes. Heavy rain, including potential flooding, is forecast from the Ozarks into the Ohio Valley Sunday into Tuesday, with wintry precipitation just north of this area.

Hypothermia

Firefighter Health & First Aid

Hypothermia occurs when your core body temperature falls below normal. It can easily happen in cold winds or wetness. Hypothermia can also occur in moderately cool temperatures, particularly if coupled with dehydration. People tend to forget to drink on cool, wet days, and can get hypothermic even when the temperature stays well above freezing.

● Symptoms of hypothermia include:

- Slurred speech.
- Weakness and loss of coordination.
- Confusion.
- Irrational behavior.
- Uncontrollable shivering (although, at extremely low body temperatures, shivering may stop).
- Pale and cold skin.
- Drowsiness – especially in more severe stages.
- Slowed breathing or heart rate.

Your body automatically begins to shiver to warm itself. As your energy is used up to keep warm, you may reach a point where your body will be unable to warm itself. If left untreated, your body will gradually shut down; and you can die.

● You can avoid hypothermia with the following precautions:

- Stay hydrated.
- Avoid fatigue.
- Avoid cold winds.
- Change out of wet clothes.
- Be aware of the symptoms and act immediately upon their onset.

● If you recognize hypothermia, take the following steps:

- Move the patient to shelter.
- Remove wet clothes and replace them with warm, dry garments.
- If the victim is alert, give them food and warm liquids to drink.
