

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, March 29, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity (March 26 – March 28, 2022):**

Initial attack activity:	Light (436 Fires)
New large incidents:	27
Large fires contained:	15
Uncontained large fires: ***	31
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 0 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

#### **Southern Area (PL 4)**

New fires:	331
New large incidents:	25
Uncontained large fires:	29
Type 2 IMTs committed:	1

\* **Thomas Divide**, Great Smoky Mountains NP, NPS. IMT 2 (SA Gold Team). Two miles northeast of Bryson City, NC. Minimal fire behavior with backing. Residences threatened.

**Eastland Complex** (3 fires), Texas A&M Forest Service. Started on private land two miles southeast of Romney, TX. Grass and timber. Minimal fire behavior with creeping and smoldering. Numerous residences threatened.

\* **Chimney Rock**, Cherokee NF, USFS. Six miles northeast of Del Rio, TN. Hardwood litter. Active fire behavior. Residences threatened. Road and trail closures in effect.

**Golf Course**, Chickasaw Agency, BIA. Four miles north of Wetumka, OK. Hardwood litter and tall grass. Minimal fire behavior with smoldering.

\* **Ramsey**, Texas A&M Forest Service. Two miles northwest of Blanket, TX. Timber and brush. Moderate fire behavior with creeping and smoldering. Residences threatened.

\* **Crittenburg Complex**, Texas A&M Forest Service. Started on private land 12 miles southeast of Gatesville, TX. Tall grass and brush. Moderate fire behavior with spotting and flanking. Several communities threatened.

\* **Das Goat**, Texas A&M Forest Service. Started on private land 15 miles northeast of Hondo, TX. Brush and tall grass. Minimal fire behavior with smoldering. Numerous structures threatened. Precipitation occurred over the fire area yesterday.

\* **Cedar Creek**, North Carolina Forest Service. Ten miles southeast of Fayetteville, NC. Southern Rough. Extreme fire behavior with spotting.

\* **Blue Devil**, Wewoka Agency, BIA. Five miles southeast of Bowlegs, OK. Hardwood litter and tall grass. Extreme fire behavior with running and spotting. Residences threatened.

**Salt**, Okmulgee Field Office, BIA. Eight miles northwest of Henryetta, OK. Tall grass. Extreme fire behavior with running and flanking. Structures threatened.

\* **Round Mountain**, Oklahoma DOF. Thirteen miles southeast of Stillwell, OK. Hardwood litter. Active fire behavior with wind-driven runs.

\* **4366 Lane**, Oklahoma DOF. Three miles north of Tushakoma, OK. Hardwood litter and short grass. Minimal fire behavior with creeping.

\* **High Top**, Oklahoma DOF. Eight miles southwest of Poteau, OK. Hardwood litter. Active fire behavior with wind-driven runs, running and backing.

\* **Boggs Hollow Creek**, Oklahoma DOF. Nine miles south of Wilburton, OK. Closed timber litter and tall grass. Minimal fire behavior with backing.

\* **Sardis Church**, Oklahoma DOF. Ten miles south of Hartshorne, OK. Closed timber litter and tall grass. Moderate fire behavior with uphill runs, flanking and backing.

\* **West Buffalo**, Oklahoma DOF. Seven miles northwest of Wilburton, OK. Closed timber litter. Moderate fire behavior with backing and uphill runs.

\* **Copeland Ranch**, Oklahoma DOF. Three miles southeast of Locust Grove, OK. Timber and slash. Active fire behavior with uphill runs.

\* **Bosque River**, Texas A&M Forest Service. Started on private land three miles east of Iredell, TX. Tall grass and brush. Moderate fire behavior with creeping and spotting.

**West Nueces**, Texas A&M Forest Service. Started on private land 34 miles northwest of Uvalde, TX. Tall grass and brush. Active fire behavior with wind-driven runs.

\* **TV3**, Oklahoma DOF. Five miles northeast of Quinton, OK. Closed timber litter and tall grass. Minimal fire behavior. Structures threatened.

\* **Quinton Overlook**, Oklahoma DOF. Two miles north of Quinton, OK. Closed timber litter and tall grass. Minimal fire behavior.

\* **Pebble Ridge**, Oklahoma DOF. Seven miles south of Eufaula, OK. Closed timber litter. Minimal fire behavior.

\* **Sulphur Mountain**, Oklahoma DOF. Two miles southeast of Kiamichi, OK. Hardwood litter and short grass. Moderate fire behavior with backing and uphill runs. Structures threatened.

\* **Gator**, Oklahoma DOF. Thirteen miles north of Muldrow, OK. Hardwood litter and timber. Active fire behavior with spotting.

**Chipola Complex** (2 fires), Florida Forest Service. Eighteen miles east of Panama City, FL. Heavy slash, brush and tall grass. No new information.

**Veterans Lake**, Oklahoma DOF. Two miles south of Sulphur, OK. Hardwood litter. No new information.

\*\*\*Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

**Predictive Services Discussion:** Critical to locally extremely critical fire weather conditions will develop today across the southern High Plains into the central and southern Plains, with sustained southwest winds of 20-35 mph gusting to 40-60 mph and minimum relative humidity of 5-15%. These critical conditions will develop behind a dryline and south of an approaching cold front. Dry conditions will continue from New England into the Southeast and Florida along and east of the Appalachians, including areas of extremely critical low relative humidity. Scattered to widespread showers and thunderstorms, including severe thunderstorms, are expected from central Texas into the Midwest, with snow across portions of the northern Plains into the western Great Lakes. Precipitation, including potentially heavy snow in the mountains, will fall across much of the Intermountain West.

## Serious Injury Procedures

*Firefighter Health & First Aid*

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to ensure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your Crew Boss, Division Supervisor, Incident Commander, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide accurate, concise information on the following:
  - Number of people injured.
  - Type of injuries.
  - Severity of injuries (light, moderate, severe, life threatening).
  - Mechanism of injury.
  - Vital signs (pulse, respiration, level of consciousness, etc.).
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic. Provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, ensure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
