

**National Interagency Coordination Center
Incident Management Situation Report
Monday, May 30, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

| | |
|-------------------------------|------------------|
| Initial attack activity: | Light (74 fires) |
| New large incidents: | 2 |
| Large fires contained: | 1 |
| Uncontained large fires: ** | 12 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 3 |
| Type 2 IMTs committed: | 3 |
| ***Complex IMTs committed: | 0 |

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there is 1 fire being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 5)

| | |
|--------------------------|----|
| New fires: | 11 |
| New large incidents: | 1 |
| Uncontained large fires: | 7 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 3 |
| Type 2 IMTs committed: | 3 |

Hermits Peak, Santa Fe NF, USFS. NIMO (Team 2), IMT 1 (CA Team 2), IMT 1 (PNW Team 2) and IMT 1 (SW Team 2). Twelve miles northwest of Las Vegas, NM. Grass and timber. Active fire behavior with flanking, backing and group torching. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Lost Lake, Colorado River Agency, BIA. Fifteen miles southwest of Parker, AZ. Active fire behavior with wind-driven runs, spotting and flanking. Numerous structures threatened. Road and area closures in effect.

Black, Gila NF, USFS. Transfer of command from IMT 2 (SW Team 5) to IMT 2 (SW Team 3) will occur today. Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with uphill runs, flanking and group torching. Structures threatened. Evacuations, area, road and trail closures in effect.

Bear Trap, Cibola NF, USFS. IMT 2 (CA Team 10). Twenty-two miles southwest of Magdalena, NM. Timber. Minimal fire behavior with creeping, backing and smoldering. Structures threatened. Area, road and trail closures in effect.

Cerro Pelado, Santa Fe NF, USFS. IMT 2 (RM Team 3). Seven miles east of Jemez Springs, NM. Grass, brush and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

*** Foster**, Coronado NF, USFS. Thirty miles southwest of Animas, NM. Timber and short grass. Extreme fire behavior with wind-driven runs, flanking and spotting.

Biggs, Capitan District, New Mexico State Forestry. Seven miles east of Corona, NM. Brush and grass. No new information. Last report unless new information has been received.

Predictive Services Discussion: Elevated to critical fire weather conditions will continue today across much Arizona, New Mexico, west Texas, and southern Colorado into southwest Kansas. Dry and gusty northerly winds will continue in portions of the Central Valley and southern California as well. Hot and dry weather is forecast again for much of Alaska, with thunderstorm chances in portions of the Interior. Severe thunderstorms are likely to develop across much of the central and northern Plains into portions of the Midwest and far western Great Lakes. Precipitation, including snow down to 4,000 – 6,000 feet in some locations, is expected across portions of the Pacific Northwest, northern Rockies, and northern Great Basin, with the greatest coverage and amounts across Wyoming. Heavy snow is likely in the Wind River, Bighorn, and Absaroka Mountains. Lower relative humidity and breezy winds are possible from central Texas through the Southeast into the central Appalachians, but recent rainfall will mitigate fire weather concerns.

Hazard Tree – No Work Zones (NWZ)

Felling Safety Category

Knowing the exact time a given hazard tree (or compromised section) will fail is extremely difficult, and is, in many cases, an unpredictable task. Given this fact, we need to manage firefighters' exposure to these hazards by creating a safe work area or No Work Zone (NWZ). The size and extent of the NWZ must be determined by onsite conditions, such as terrain, stand structure, and fire impacts on the tree and adjoining trees.

When an identified hazardous tree or trees cannot be felled, then perform an assessment of which areas have too high a risk and post a lookout to warn the personnel to stay clear of these areas while working in adjacent areas. If hazard still exists before leaving the area, flag the NWZ so that personnel entering the area will be able to recognize the hazard. Use the following failure zone illustrations as examples to help manage firefighter exposure to these identified hazards. Also, remember to include the possibility of the Domino Effect to surrounding trees.

Figure 1 – $1\frac{1}{2} \times$ Height of snag Figure 2 – $1\frac{1}{2} \times$ trunk-to-branch-tip distance

Figure 3 - $1\frac{1}{2} \times$ length of dead top.
