

National Interagency Coordination Center
Incident Management Situation Report
Sunday, October 2, 2022 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (53 fires)
New large incidents:	1
Large fires contained:	3
Uncontained large fires: **	19
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	3
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 66 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Northwest Area (PL 2)

New fires:	5
New large incidents:	0
Uncontained large fires:	7
Type 2 IMTs committed:	2

Cedar Creek, Willamette NF, USFS. IMT 2 (NW Team 7) and IMT 2 (NW Team 9). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Minimal fire behavior with creeping, isolated torching and smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Double Creek, Wallowa-Whitman NF, USFS. Ten miles southeast of Imnaha, OR. Timber and grass. Minimal fire behavior with creeping, backing and smoldering. Area, road and trail closures in effect.

Goat Rocks, Gifford Pinchot NF, USFS. Eight miles east of Packwood, WA. Timber and closed timber litter. Minimal fire behavior with flanking, backing and creeping. Numerous residences threatened. Area, road and trail closures in effect.

White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Numerous structures threatened. Area, road and trail closures in effect.

Irving Peak, Okanogan-Wenatchee NF, USFS. Twenty-six miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Structures threatened. Area, road and trail closures in effect. Last report unless significant activity occurs.

Minnow Ridge, Okanogan-Wenatchee NF, USFS. Twenty-five miles north of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Area, road and trail closures in effect. Last report unless significant activity occurs.

Kalama, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber and light slash. No new information. Last report unless new information is received.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov>

Predictive Services Discussion: South-southeast sustained winds of 12-20 mph gusting 20-30 mph amid minimum relative humidity of 15-30% is forecast across the southern and central Plains into portions of southeast South Dakota and southwest Minnesota likely resulting in locally elevated conditions. Continued low relative of 20-35% is expected across the Ozarks and Lower Mississippi Valley to the central Gulf Coast, east and central Texas, and eastern Oklahoma, with occasionally gusty northerly to easterly winds. Isolated to scattered thunderstorms are likely from the Southwest through the greater Four Corners into southeast Montana and the northern and central High Plains. Scattered showers are likely across portions of Montana into northern Wyoming and western North Dakota. Rain is expected across the Mid-Atlantic as remnants of Iain continue over the region.

Grant West RX (California) – October 2, 2004

This Day in History

Incident Summary: A prescribed fire was planned in the Grant Grove Sub District of Kings Canyon National Park. This park had long been known for its active prescribed fire program and, since 1981, had been home to the Arrowhead Hotshots. The unit being burned this day has been burned several times before. The predominant tree in this unit was white fir, a high-risk species, which had suffered a considerable die-off due to a Tussock Moth infestation. The unit had been prepped and hose-lays installed. Numerous snags along the line had been evaluated for firefighter safety and holding concerns. Some hazard trees were cut down or lined. One 146-foot-tall white fir snag 12 feet inside the line was considered sound by experienced firefighters and left standing. Torching brush and short trees during the test burn sent embers into the top of the snag where, within minutes, smoke and then flames were observed. The snag became a hazard as well as a holding concern. It was decided to fall the snag. Advanced Fallers (FAL1) were called over to size-up the tree. Daniel Holmes, an Arrowhead Hotshot, was the swamper. Because of its lean, it was decided to drop it across the line and to move the hose-lay so that it could be suppressed as a spot fire. Holmes and another faller pass under the snag on the fireline as they walk over to assist in moving the hose-lay before they cut the tree. Several firefighters see the top of the snag fall and yell. Holmes and the faller started to run but the falling tree top hit Holmes on the head and he was knocked out. He never regained consciousness.

Daniel Holmes would become the 20th firefighter killed by a snag since 1960.

Discussion Points:

The morning began with a safety briefing and most of the firefighters confirmed that snag hazards were emphasized several times.

- If you were giving your crew a briefing about hazard trees in your area, what points would you emphasize?
- You and your crew are sizing up hazard trees in preparation for a prescribed burn in your area.
- What are the common high-risk species of trees?
- Discuss how you will determine the soundness of the trees.
- What are the common indicators that they have become unhealthy/unsafe?
- Knowing when the top of this tree would fall is impossible. The top of the snag had been burning for less than 2 hours. The winds had been light.
- Would you have considered this tree as hazardous as it really was?
- Knowing that the top of the tree might eventually fall, what will you do to be ready for it?
- Though there were three experienced fallers paying attention to the burning snag during its size-up, once the firefighters transitioned to moving the hose-lay there was not a dedicated lookout assigned for that task.

- How will you and your crew manage the safety of all firefighters when you are in a similar transition situation?
- How can you better expect the unexpected after reading about this tragic accident?

Arrowhead Hotshot Daniel Holmes – 2004
