

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, October 8, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

Initial attack activity:	Light (92 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires: **	11
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4
***Complex IMTs committed:	1

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 68 fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Northwest Area (PL 2)**

New fires: 3  
 New large incidents: 0  
 Uncontained large fires: 5  
 Type 2 IMTs committed: 2

**Cedar Creek**, Willamette NF, USFS. Transfer of command from IMT 2 (NW Team 9) to IMT 2 (NW Team 12) will occur tomorrow. Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Moderate fire behavior with uphill runs, creeping and spotting. Numerous structures threatened. Area, road and trail closures in effect.

**Goat Rocks**, Gifford Pinchot NF, USFS. Eight miles east of Packwood, WA. Timber and closed timber litter. Minimal fire behavior with flanking, backing and creeping. Numerous residences threatened. Area, road and trail closures in effect.

**White River**, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Numerous structures threatened. Area, road and trail closures in effect.

**Kalama**, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber. Moderate fire behavior with creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

**Siouxon**, Gifford Pinchot NF, USFS. Previously reported incident. Thirteen miles northwest of Stabler, WA. Timber and light slash. Moderate fire behavior with creeping and smoldering. Trail closures in effect. Last narrative report unless significant activity occurs.

**Double Creek**, Wallowa-Whitman NF, USFS. Ten miles southeast of Imnaha, OR. Timber and grass. No new information.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov>

**Predictive Services Discussion:** An upper trough and associated cold front in British Columbia will move south and east into the Columbia Basin and northern Rockies tonight. West winds 12-25 mph with gusts 25-40 mph will develop across the Inland Northwest through Idaho and into Montana and Wyoming. Relative humidity of 10-25% will create elevated conditions, particularly in the Inland Northwest where fuels are driest. Low afternoon relative humidity of 15-30% will continue across the northern Plains into the Midwest and Deep South, with breezy south winds across the northern Plains creating locally elevated conditions.

Isolated showers and thunderstorms are expected across southeast California into the southern Great Basin and Arizona while scattered to numerous showers and thunderstorms are forecast farther east into New Mexico, the Colorado Rockies, and west Texas. Showers and isolated thunderstorms may spread into portions of the central Plains overnight as well. Behind the front in the northwestern US, isolated to scattered showers are possible in the Washington Cascades and northwest Montana. Scattered showers and thunderstorms are also forecast across portions of the Florida peninsula.

# Hazard Tree - Risk Management

## *Felling Safety Category*

Consider the severity, probability, and exposure of hazard tree problems continually as you perform duties in forested communities. Remember to look for hazard tree risks at staging areas, parking areas, and camping areas.

### **Environmental Element:**

- Existing winds and forecast.
- Night operations or low visibility situations limiting your view of surroundings.
- Steep slopes.
- Diseased or bug-kill areas with high densities of dead or dying trees.
- Number, density, and height of hazard trees.
- Amount of time the area has been burning – burn down time.
- Potential for domino effect to surrounding trees.

### **Hazard Tree Indicators:**

- Trees burning for any period of time.
- High-risk tree species (rot and shallow roots).
- Numerous downed trees in the area.
- Dead, broken, or burning tops and limbs overhead.
- Accumulation of downed limbs.
- Fungus or growth of decay species on the tree.
- Cavities or evidence of woodpecker damage.
- Forked tops, multiple tops, and/or uneven branch distribution.
- Absence of needles, bark, or limbs.
- Leaning or hung-up.

### **Hazard Control:**

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment.
- Avoid hazards by designating “No Work Zones” (NWZ) – (flag, sign, and map).
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area.
- Post lookouts to help maintain a secure area.
- Fireproof potential hazard trees to prevent ignition.
- Initiate road/traffic control and area closure.
- Keep clear of bucket drops near trees/snags.
- Establish trigger points for reposition to secure areas in response to high winds.
- Minimize exposure time in hazard tree areas using efficient felling techniques and limiting numbers of personnel in hazardous areas.
