

National Interagency Coordination Center
Incident Management Situation Report
Sunday, October 16, 2022 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (43 fires)
New large incidents:	3
Large fires contained:	1
Uncontained large fires: **	12
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 65 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Northwest Area (PL 2)

New fires:	2
New large incidents:	1
Uncontained large fires:	6
Type 2 IMTs committed:	2

Cedar Creek, Willamette NF, USFS. IMT 2 (NW Team 12). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Active fire behavior with uphill runs, creeping and spotting. Numerous structures threatened. Area, road and trail closures in effect.

* **Loch Katrine**, Mt. Baker-Snoqualmie NF, USFS. IMT 2 (NW Team 9) mobilizing. Thirteen miles northeast of Snoqualmie, WA. Closed timber litter, timber and medium slash. Active fire behavior with wind-driven runs, flanking and group torching. Area, road and trail closures in effect.

Goat Rocks, Gifford Pinchot NF, USFS. Eight miles east of Packwood, WA. Timber and closed timber litter. Moderate fire behavior with flanking, backing and creeping. Numerous residences threatened. Area, road and trail closures in effect.

White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior. Numerous structures threatened. Area, road and trail closures in effect.

Kalama, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber. Moderate fire behavior with smoldering, creeping and backing. Structures threatened. Area, road and trail closures in effect.

Suiattle River, Mt. Baker-Snoqualmie NF, USFS. Eleven miles northeast of Darrington, WA. Timber. Active fire behavior with flanking, backing and torching. Structures threatened. Road and trail closures in effect.

Nakia Creek, Pacific Cascade Region, Washington DNR. Started on private land nine miles northeast of Camas, WA. Timber, medium slash and brush. No new information.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov>

Predictive Services Discussion: Gusty offshore, easterly winds of 20-40 mph with minimum relative humidity of 20-35% are likely through the morning on western slopes of the Cascades in Washington and Oregon and may continue into the evening, with increased fire activity again likely on large fires in the region. Onshore flow should move into portions of western Washington and Oregon tonight, but poor to moderate humidity recovery is likely to continue in much of the Cascades, especially along and east of the crest. Above normal temperatures and minimum relative humidity of 8-25% are expected across much of the Great Basin, northern California, and the Inland Pacific Northwest as well. Warm and dry conditions are expected in portions of the Florida Panhandle, Georgia, Alabama, and South Carolina. Thunderstorms and showers, including areas of heavy rain and flooding, are likely in much of the Southwest, Texas, southern Oklahoma, and extending through portions of Arkansas, Tennessee, the central Appalachians, and the Mid-Atlantic. Isolated showers, including possible snow, are likely in portions of the Great Lakes.

Helicopter Landing Area Safety

Aviation Category

The following points should be considered when operating around an unimproved landing site: Is the helicopter a Type 1? For larger helicopters, increase the distance ground personnel must stand by from the drop zone.

- Always wear your personal protective equipment (PPE) when working near an operating helicopter (eye, hearing, head, etc.).
- Always get the approval of a flight crew member or the pilot before approaching an operating helicopter.
- Only approach and depart a helicopter as directed. Use a slightly crouched position. Do not run. Always keep in the pilot's field of vision.
- Never go near the tail of helicopters.
- When loading helicopters in uneven terrain, always approach and depart from the down slope (lower) side and do not hold equipment overhead.
- Remove or secure loose articles prior to working around an operating helicopter.
- Do not reach up for or chase after loose objects.
- Blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous. Institute dust abatement actions at the landing area if necessary.
