

Incident Management Situation Report
Monday, October 24, 2022 – 0730 MDT
National Preparedness Level 2

National Fire Activity (October 21, 2022 – October 23, 2022):

Initial attack activity:	Light (176 fires)
New large incidents:	10
Large fires contained:	8
Uncontained large fires: **	13
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 29 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

This report will be posted Monday – Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

Northwest Area (PL 2)

New fires:	5
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nakia Creek, Pacific Cascade Region, Washington DNR. IMT 1 (ODF Team 2). IMT is also managing the Black Hole incident. Started on private land nine miles northeast of Camas, WA. Timber, medium slash and brush. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Black Hole, Pacific Cascade Region, Washington DNR. Five miles northeast of Amboy, WA. Timber and heavy slash. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Loch Katrine, Mt. Baker-Snoqualmie NF, USFS. IMT 2 (NW Team 9). IMT is also managing the Suiattle River and Boulder Lake incidents. Thirteen miles northeast of Snoqualmie, WA. Closed timber litter, timber and medium slash. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Suiattle River, Mt. Baker-Snoqualmie NF, USFS. Eleven miles northeast of Darrington, WA. Timber. Minimal fire behavior with smoldering. Structures threatened. Road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Boulder Lake, Mt. Baker-Snoqualmie NF, USFS. Thirteen miles northeast of Darrington, WA. Timber and brush. Minimal fire behavior with smoldering. Road and trail closures in effect. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

Cedar Creek, Willamette NF, USFS. IMT 2 (EA Silver Team). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Minimal fire behavior with smoldering. Numerous structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Goat Rocks, Gifford Pinchot NF, USFS. IMT 2 (RM Black Team). IMT is also managing Sunset and Siouxon incidents. Eight miles east of Packwood, WA. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Numerous residences threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Sunset, Gifford Pinchot NF, USFS. Eight miles east of Moulton, WA. Closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Siouxon, Gifford Pinchot NF, USFS. Thirteen miles northwest of Stabler, WA. Closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Kalama, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber. Minimal fire behavior with smoldering. Structures threatened. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov>

Predictive Services Discussion: Locally gusty north to northeast winds with low relative humidity will continue this morning across portions of northern California before ending this afternoon. Breezy south winds of 10-20 mph with gusts 20-30 mph amid relative humidity of 18-30% are forecast over the Ohio and Tennessee Valleys creating locally elevated conditions ahead of a cold front. Closer to the cold front over Texas, Oklahoma, and eastern Kansas, showers with embedded thunderstorms will develop and continue overnight as they move into the Mid-Mississippi Valley and western Great Lakes. Light showers, and high elevation snow showers, are expected to continue into the afternoon across New Mexico and the southern Colorado Rockies before ending. A Pacific cold front will move through the Pacific Northwest and into the northern Rockies bringing widespread rain and mountain snow.

All-Terrain Vechicle (ATV) – Transport

Vehicle/Roads Category

All-Terrain Vehicle (ATV) Loading/Unloading

Loading/unloading of ATVs has resulted in serious injury and even death to employees. Only those who have been fully trained in ATV operations should conduct loading/unloading procedures. The following safety measures are recommended:

- Wear all personal protective equipment (including gloves, helmet, etc.) until ATV is either secured or unloaded.
- Ensure header board (board placed in front of bed of truck or trailer) is in place and in good condition.
- ATV tire ramps should be secured to trailer or tailgate and on level terrain.
- If possible, use a tilt trailer to haul an ATV. If this is not feasible, try to lower back end of vehicle so slant of loading ramp is reduced. Back into a ditch, hillside, or anything else to try and lower back end of vehicle.
- When loading ATV onto vehicle or trailer, keep seated, and lean body weight forward on ATV.
- When unloading ATV, keep seated and keep weight forward. This helps keep ATV from flipping over backwards.
- Never load or unload an ATV with a load on the racks. Load all ATVs empty.

Securing ATV for Transport

Improperly loaded ATVs can be dangerous to you and other highway users. Steering can be affected if your load is not properly distributed. If not properly secured, the ATV can become dislodged during a quick stop or crash and damage equipment and cause injury or death.

Drivers are responsible for their load—regardless of who actually loads equipment. All drivers are responsible for:

- Inspecting the ATV.
- Recognizing overloads and poorly balanced weight.
- Removing any gear loaded on the ATV.

Securing ATVs

- Secure ATV in its normal operating position, on all four wheels.
- Set the parking brake and place transmission in gear.
- Turn off fuel valve.
- Use chocks (that fit snugly against wheels) in front and back of ATV. Front end header boards should also block forward movement of ATV.
- Tie down ATV at each corner. Use tie downs made from one-inch nylon strap or greater, with hooks at each end and ratcheting buckles (ordinary rope should not be used due to stretching), or tie-down straps that will lock in place.
- ATVs should never be hauled with a load attached to the cargo racks. Hazards exist from losing the load from the ATV while in transit.
