

Incident Management Situation Report
Tuesday, October 25, 2022 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (112 fires)
New large incidents:	2
Large fires contained:	7
Uncontained large fires: **	7
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 29 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

This report will be posted Monday – Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary							
GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	0	0	0	0	0	0	0

Northwest Area (PL 2)

New fires:	4
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nakia Creek, Pacific Cascade Region, Washington DNR. IMT 1 (ODF Team 2). IMT is also managing the Black Hole incident. Started on private land nine miles northeast of Camas, WA. Timber, medium slash and brush. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Black Hole, Pacific Cascade Region, Washington DNR. Five miles northeast of Amboy, WA. Timber and heavy slash. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Loch Katrine, Mt. Baker-Snoqualmie NF, USFS. IMT 2 (NW Team 9). IMT is also managing the Suiattle River and Boulder Lake incidents. Thirteen miles northeast of Snoqualmie, WA. Closed timber litter, timber and medium slash. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Suiattle River, Mt. Baker-Snoqualmie NF, USFS. Eleven miles northeast of Darrington, WA. Timber. No new information.

Cedar Creek, Willamette NF, USFS. IMT 2 (EA Silver Team). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Goat Rocks, Gifford Pinchot NF, USFS. IMT 2 (RM Black Team). IMT is also managing Sunset and Siouxon incidents. Eight miles east of Packwood, WA. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Sunset, Gifford Pinchot NF, USFS. Eight miles east of Moulton, WA. Closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Siouxon, Gifford Pinchot NF, USFS. Thirteen miles northwest of Stabler, WA. Closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Kalama, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber. Minimal fire behavior with smoldering. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov>

Predictive Services Discussion: A cold front in the Mississippi Valley this morning will move east into the eastern Great Lakes, central and southern Appalachians, and Florida Panhandle tonight. Strong to severe thunderstorms are forecast across portions of the Deep South from eastern Louisiana through Mississippi into western Alabama and southwest Tennessee. Showers and isolated thunderstorms will also move through Ohio Valley into the Great Lakes. However, as the cold front moves into the southern Appalachians and Georgia, it is forecast to weaken with expected rainfall to be scattered and light across Georgia and the southern Appalachians. Behind the front, breezy and dry northwest winds will continue across much of the central and southern Plains.

A weakening storm will move through the Great Basin and central Rockies, but still bring light rain and mountain snow to the eastern Great Basin, western Wyoming, and West Slope. Another fast-moving storm will move into the Pacific Northwest, northern Great Basin, and northern Rockies this afternoon into tonight with more valley rain, and mountain snow.

Hazard Tree Felling – Hang-Ups

Felling Safety Category

Felling a hung-up hazard tree is a particularly hazardous and complex task. Safely felling a hang-up requires extreme caution and expertise.

The following are some topics sawyers should review during tailgate safety discussions to address felling hang-up hazard trees:

Size up and Evaluation:

- Cut/No Cut (walk-away). Is tree secure and does it need to come down?
- What type of hang-up? In a fork, pinched between two trees, or resting on limbs?
- Vertical hang-ups have increased complexities.
- Condition of all relevant trees live, dead, rot, etc. Does the hang-up tree have any weak areas that could fail?
- Obscured view of top?
- If sawyer is unsure of the outcome, do not attempt to cut a leaner.

Operational Considerations:

- Escape routes for unforeseen circumstances?
- Consider falling trees as a group.
- Consider face cuts versus slash cuts for directional control.
- Rope technique allows increased distance from danger zones.

Alternative Mitigations:

- Blasting
- Heavy equipment/cable
- No Work Zones

Discuss any personal lessons learned with hang-up trees that you may have experienced.
